Consequently, they cannot explain the context in which relationships occur or their consequences, except as resultants of endless 'transactions'. This book adopts a different approach which regards 'the relation' itself as an emergent property, with internal causal effects upon its participants and external ones on others. This was Steve Jobs' confession on that morning in June 2005 to students at Stanford University. It summed up the growth that was slowly taking place in him. Chased out of Apple like scum in 1985, Jobs had made a resounding comeback ten years later and gave us devices that left a mark on their time, such as the iPod, iPhone and iPad. The world's most admired CEO, Steve Jobs mostly went against the tide, driven by a vision of genius and an extraordinary strength of conviction.
