I have a 1991 CRX SI with a custom built Turbonetics T3/T4 hybrid. It's pretty much stock bottom end, I was running 8-10 psi with no issues. This car is completely rust free, the rear quarters did have the start of the dreaded rust blisters, but they were professionally fixed.

Japanese carmaker Honda has pioneered a new breed of multinational enterprise - true manufacturing at the global scale. Honda has been a leader in confounding predictions that Japan's carmakers would and could never transfer their success abroad, and that a wholesale 'Japanization' of the west would be provoked if they did. The book covers manufacture, research and development, sourcing of components, human resources and labour relations, collaboration with western firms, political controversy, and the role of concepts and ideas, in Japan, North America, and Europe.

The Honda K-Series engine was introduced in 2001, replacing the B-Series as the engine of choice for Honda enthusiasts. These new K-Series engines are the most powerful stock Honda/Acura engines you can get. They featured

new technology such as a roller rocker valvetrain, better flowing heads, and advanced variable cam timing technology that made these engines suddenly the thing to have. And that's where the engine swappers come in. In *Honda K-Series Engine Swaps*, author Aaron Bonk guides you through all the details, facts, and figures you will need to complete a successful K-Series swap into your older chassis. All the different engine variants are covered, as well as interchangeability, compatibility, which accessories work, wiring and controls operation, drivetrain considerations, and more. While you can still modify your existing B-Series, dollar for dollar, you can't make more power than you can with a Honda K-Series engine. If you have an older chassis and are looking for a serious injection of power and technology, swapping a K-Series engine is a great option. *Honda K-Series Engine Swaps* will tell you everything you need to know.

A comprehensive guide to modifying the D, B and H series Honda and Acura engines.
