Nine new articles were proposed, and five new articles emerged in the 2017 NEC. Many of the changes and new rules in this edition specifically address new technologies, such as expanded use of energy-storage systems and equipment; microgrid installations; and large-scale, photovoltaic (PV) system installations, but in total, the changes are as diverse as the Code itself.

The changing landscape has caused electrical experts to re-imagine the future of the electrical grid, and has been one of the main drivers for three of the most important proposed additions to the 2017 National Electrical Code® (NEC®). More and larger consumer-owned power generation has caused the NEC's code-making panels to consider systems and circumstances they never had previously.

2017 Nec Code Changes Home Otter Tail Power Company  
The 2017 National Electrical Code (NEC) includes several sections with new short-circuit protection requirements. The most significant changes require that the available short-circuit current at the location where the equipment is installed is marked/ documented and dated. These changes allow installers, inspectors and approvers to verify that the installed equipment short-circuit current rating (SCCR) is equal to or greater than the available short-circuit current, and compliant with the ...

NFPA 70 National Electrical Code (NEC) sets the foundation for electrical safety in residential, commercial, and industrial occupancies. The 2017 edition of this trusted Code presents the latest comprehensive regulations for electrical wiring, overcurrent protection, grounding, and installation of equipment.

## Where To Download 2017 Nec Code Changes Home Otter Tail Power Company

This comprehensive code comprises all building, plumbing, mechanical, fuel gas and electrical requirements for one- and two-family dwellings and townhouses up to three stories. The IRC contains many important changes such as: An updated seismic map reflects the most conservative Seismic Design Category (SDC) based on any soil type and a new map reflects less conservative SDCs when Site Class A, B or D is applicable. The townhouse separation provisions now include options for using two separate fire-resistant-rated walls or a common wall. An emergency escape and rescue opening is no longer required in basement sleeping rooms where the dwelling has an automatic fire sprinkler system and the basement has a second means of egress or an emergency
