This practical, engaging book explores the fundamentals of pedagogy and the unique challenges of teaching undergraduate mathematics not commonly addressed in most education literature. Professor and mathematician, Suzanne Kelton offers a straightforward framework for new faculty and graduate students to establish their individual preferences for course policy and content exposition, while alerting them to potential pitfalls. The book discusses the running of day-to-day class meetings and offers specific strategies to improve learning and retention, as well as concrete examples and effective tools for class discussion that draw from a variety of commonly taught undergraduate mathematics courses. Kelton also offers readers a structured approach to evaluating and honing their own teaching skills, as well as utilizing peer and student evaluations. Offering an engaging and clearly written approach designed specifically for mathematicians, *A Beginner's Guide to Teaching Mathematics in the Undergraduate Classroom* offers an artful introduction to teaching undergraduate mathematics in universities and community colleges. This text will

Indigenous Cultural Translation is about the process that made it possible to film the 2011 Taiwanese blockbuster *Seediq Bale* in Seediq, an endangered indigenous language. *Seediq Bale* celebrates the headhunters who rebelled against or collaborated with the Japanese colonizers at or around a hill station called Musha starting on October 27, 1930, while this book celebrates the grandchildren of headhunters, rebels, and collaborators who translated the Mandarin-language screenplay into Seediq in central Taiwan nearly eighty years later. As a "thick description" of *Seediq Bale*, this book describes the translation process in detail, showing how the screenwriter included Mandarin translations of Seediq texts recorded during the Japanese era in his screenplay, and then how the Seediq translators backtranslated these texts into Seediq, changing them significantly. It argues that the translators made significant changes to these texts according to the consensus about traditional Seediq culture they have been building in modern Taiwan, and that this same consensus informs the interpretation of the Musha Incident and of Seediq culture that they articulated in their Mandarin-Seediq translation of the screenplay as a whole. The argument more generally is that in building cultural consensus, indigenous peoples like the Seediq are "translating" their traditions into alternative modernities in settler states around the world.

The fully updated second edition of this critical work includes a new introduction, a wide range of new entries and added specialised further reading for lecturers and more advanced students.
