Many analysts are too concerned with tools and techniques for cleansing, modeling, and visualizing datasets and not concerned enough with asking the right questions. In this practical guide, data strategy consultant Max Shron shows you how to put the why before the how, through an often-overlooked set of analytical skills. Thinking with Data helps you learn techniques for turning data into knowledge you can use. You'll learn a framework for defining your project, including the data you want to collect, and how you intend to approach, organize, and analyze the results. You'll also learn patterns of reasoning that will help you unveil the real problem that needs to be solved. Learn a framework for scoping data projects Understand how to pin down the details of an idea, receive feedback, and begin prototyping Use the tools of arguments to ask good questions, build projects in stages, and communicate results Explore data-specific patterns of reasoning and learn how to build more useful arguments Delve into causal reasoning and learn how it permeates data work Put everything together, using extended examples to see the method of full problem thinking in action

This book was written to help anyone who wants to learn how to service their car. The text is large, the pictures are in color and the procedures are demonstrated in YouTube videos. The book is intended to be a guide and although it is not a shop manual, it was designed to be comprehensive without getting to the technical level of wiring diagrams and engine rebuild procedures. It's for everyday people who want a well-rounded complete guide to show them how to take care of their car. This book will guide you in learning how to perform money saving services on your car. Written in large text, illustrated in full color, and supported by YouTube videos, it covers car safety, car systems, and car service Here are a few examples of recommended minimum safety practices * let someone know whenever you plan to work under a vehicle * wear safety glasses, * always using wheel chocks * and always use jack stands whenever you raise a vehicleWe also explain how the primary systems in a car work, such as: * the ignition system * the cooling system and* the fuel system There are step-by-step demonstrations that show you how to perform many service procedures, including: * how to change your oil * how to perform a tune-up * how to do a brake job* and many more

What could possibly go wrong in paradise? Tired of mortgage payments, thirty-something Andrew and Gwynn sold nearly everything they owned but their Siamese cat and escaped their humdrum nine-to-five existence for life in paradise—a tiny island in one of the remotest spots on Earth: the Okavango Delta in Botswana. Woefully inexperienced, they took control of a luxury game lodge that catered to the likes of French aristocrats, Hollywood directors, Mafia lawyers, and the captain of the England cricket team. Not forgetting the hippos who liked to crash cocktail hour. Trouble soon followed as the reality of running a hotel on an island accessible only by boat or plane burst upon them. Andrew and Gwynn learned it's one thing for guests to wake up with gentle giraffes outside their windows, but it's quite another to keep them safe from poisonous snakes, temperamental elephants, and a hyena with a taste for plastic. All that was child's play compared to figuring out how to feed their guests when a 'quick run' to the grocery store required a plane, a bush pilot, and moderate risk to life, limb, and property. By turns funny, touching, and suspenseful, Torn Trousers is a real modern fairytale about getting exactly what you wished for...and then having to live with it.
