The process of church planting involves evangelism, the discipleship of new believers, the training of church leaders, and the organization of the church according to the New Testament model. With nearly fifty years combined global church-planting experience, Craig Ott and Gene Wilson are well qualified to write a comprehensive,

up-to-date guide for cross-cultural church planting. Combining substantive biblical principles and missiological understanding with practical insights, this book walks readers through the various models and development phases of church planting. Advocating methods that lead to church multiplication, the authors emphasize the role of the missionary church planter. They offer helpful reflection on current trends and provide best practices gathered from research and empirical findings around the globe. The book takes up a number of special issues not addressed in most church planting books, such as use of short-term teams, partnerships, and wise use of resources. Full of case studies and real examples from around the world, this practical text will benefit students, church planters, missionaries, and missional church readers.

David Garrison, PhD University of Chicago, defines Church Planting Movements as rapidly multiplying indigenous churches planting churches that sweep across a people group or population segment. Garrison's *Church Planting Movements: How God Is Redeeming a Lost World* signaled a breakthrough in missionary church planting. After the publication of Garrison's book in 2004 it became impossible to talk about missions without referencing Church Planting Movements. *Church Planting Movements* examines more than two-dozen movements of multiplying churches on five continents. After presenting these case studies, Garrison identifies ten universal elements present in each movement. He then broadens the circle of examination to identify a further ten common characteristics, factors identified in most, but not all, of the movements. He concludes his examination with a list of "Seven Deadly Sins," i.e. harmful practices that stifle or impede Church Planting Movements. Important for evangelical readers, the author returns to his findings to see how they stand up to the light of Scripture. What he discovers is that Church Planting Movements are much more consistent with the New Testament lay-led house-church movements that swept rapidly through the Mediterranean world in the face of hostile opposition than today's more sedentary professional institutionalized Christianity. Church planting is not just about gathering new communities of people who are already Christians. Planting churches flows naturally out of making disciples. In this concise guide, pastor J. D. Payne explains the process and stages of church planting, with biblical foundations and practical steps for planting teams both domestically and internationally.

Small group resources tend to overlook the spiritual side of small group leadership. And yet most would agree that spiritual preparation is the most important aspect of leading a small group. Only God's supernatural power can draw people to the truth and liberate them to be all that God wants them to be. The key distinction of this book is the spiritual perspective it gives to small group ministry. So much of the literature about small groups that is already published relates to small group technique and only touches briefly on the Spirit's power. This book is a practical reference guide to help small group leadership begin to move in the supernatural realm. The book's first priority is to help small group leaders and members trust the Holy Spirit to lead them, empower them and work in their group. Small group facilitators often sense a lack of guidance, power and spiritual authority. Jesus knew His disciples would be powerless without a touch from the Holy Spirit, and so He told them to wait in Jerusalem, saying, You will receive power when the Holy Spirit comes on you; and you will be my witnesses in Jerusalem, and in all Judea and Samaria, and to the ends of the earth (Acts 1:8). Small group leaders need a power boost to make small group ministry relevant and exciting. The second priority of this book is to help the facilitator identify and mobilize each small group member to use his or her own spiritual gifts.
