W. Creswell provides a brief and practical introduction to mixed methods. Many graduate students and researchers in the social, behavioral and health sciences may not have the time or resources to read long treatises or stacks of journal articles on mixed methods research. This text quickly describes the basics of setting up and conducting a study using this methodology. Chapters are short and follow the process of research, from ensuring skills for conducting research, acknowledging the steps in planning a study, designing studies with increasing complexity, planning sampling strategies and integration,

proposal for their dissertations, grants, or general research studies. The book intertwines descriptions of the components of a research proposal (introduction, literature review, research methods, etc.) with discussions of the essential elements and steps of mixed methods research. Examples from a real-world, interdisciplinary, mixed methods research study demonstrate concepts in action throughout the book, and an entire sample proposal appears at the end of the book, giving readers insight into every step up to completion. Readers who complete the exercises in each chapter will have an
