Evidence-Based Medicine, Osteopathic Medicine, Effective Office Management. Also, a whole new section on The Future of Family Medicine will be added. All chapters will be completely updated and with new clinical guidelines and references. Websites will be included in the references as well.

This title is directed primarily towards health care professionals outside of the United States. Liu's Labour Ward Manual has for many years been the standard work for all personnel working on the labour ward. It gives instruction on the best application of technical procedures employed in the labour ward whilst promoting the ethos that the labouring mother and the unborn child must be the prime focus of attention. Offers a one-stop guide to all aspects of labour and birth in a hospital environment Covers everything from

referenced with the Joint Royal Colleges Ambulance Liaison Committee (JRCALC) handbook to ensure full clinical relevance. Reflecting the major advances in delivery of pre-hospital care, including the greater survival benefits for heart attacks and major trauma when delivering patients directly to higher levels of care, the evolution of the paramedic role into critical care paramedics, roadside rapid sequence induction of anaesthesia, and the introduction of mechanical chest compression devices, this new edition is the ideal companion for those involved in delivering pre-hospital care. It also links to relevant online databases and mobile apps that can assist with calculations, and contains key algorithms and formulae to ensure good care. The Oxford Handbook of Pre-hospital Care is the comprehensive quick-reference guide to all medical and trauma conditions regularly encountered in the

immediate care setting.

This new book provides evidence based guidelines for the immediate clinical management of major trauma. It has been written by clinicians with many years of trauma experience, and endorsed as authoritative by Trauma Care (UK). The UK now has highly effective trauma systems. Clinical developments include the introduction of damage control resuscitation, tranexamic acid, blood product resuscitation, novel hybrid resuscitation and an emphasis on the control of major external haemorrhage as part of a new ABCDE approach. Consequently, more individuals with major trauma are surviving than ever before. Optimal pre-hospital care is essential for improved survival rates and reduced morbidity.

The only “ how-to ” manual on the obstetric patient in the critical care unit! Replete with summary tables and algorithms, this practical manual focuses on the clinical bedside management of the intensive obstetric patient. Features a generous number of tables and algorithms as well as mnemonics simplifying key points.

Fully-updated new edition of the essential guide to managing hematological conditions, affecting mother and baby during pregnancy and post-partum.

Obstetric emergencies are unplanned and often unanticipated. Management requires a clear understanding of the life-saving and damage-limiting treatments that can be implemented.

The Pre-hospital Obstetric Emergency Training (POET) programme provides an introduction to the obstetric patient and the anatomical and physiological changes that occur during pregnancy (including interpretation of patient-held records and rapid assessment of the obstetric patient). It includes clear definitions and describes risk factors, diagnosis and pre-hospital management of significant problems that occur in both early and late pregnancy and the immediate postnatal period. These are all situations that the pre-hospital practitioner may attend. This text and the accompanying integrated on-line and 'hands on' course will help practitioners identify and manage a range of time-critical obstetric emergencies specifically in the pre-hospital setting, and provides a structured examination and assessment technique as an aid to determining what treatments should be provided before

transport, as well as when and how urgently transport should be initiated. POET is of relevance to paramedics, ambulance staff, doctors, and nurses working in the emergency pre-hospital setting and to midwives facilitating home births. It will also be of considerable value to medical and nursing practitioners working in Emergency Departments and unscheduled care settings where immediate access to skilled obstetric assistance is not available.
