~~Algorithms for Basic Life Support 2020 – ACLS~~

This is intended to encourage early CPR and avoid bystanders interpreting agonal breathing as signs of life and withholding CPR. “Look, listen, and feel” for breathing is no longer recommended. Instead of assessing the person’s breathing, begin CPR if the person is not breathing (or is only gasping for breath), has no pulse (or if you are unsure), or is unresponsive.

American Heart Association BLS – Basic Life Support

In order to educate as many people as possible about the fundamental skills needed to help someone survive a cardiac arrest event, the AHA has produced a course of study called American Heart Association BLS, the most current version of which was issued in 2015.

The Save a Life Initiative has just released its newest course: Basic Life Support. This manual is based on the 2015-2020 Basic Life Support guidelines published

Online Library Aha Basic Life Support Study Guide

by the American Heart Association. The Basic Life Support (BLS) Provider Handbook is a comprehensive resource intended for health care professionals currently enrolled in a Basic Life Support Certification or Recertification Course. It serves as the primary training material for BLS Certification and Recertification courses. Although it is primarily intended for professionals to use during their courses, the handbook was also created to serve as daily resource material for health care professionals. Information covered in the handbook includes Basic Life Support instruction for adults and children, AED usage, airway obstruction and rescue breathing techniques, and more. Specific Algorithms for BLS and

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR

Online Library Aha Basic Life Support Study Guide

skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest.

Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training

Online Library Aha Basic Life Support Study Guide

will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.
