Anand Kumar, a mathematics prodigy, defied all challenges to set up one of the most successful and innovative teaching initiatives in the world-Super 30. Born in Chandipur Bela, Patna, Anand secured a place in Cambridge University but couldn't attend because he had no money and sold papads in the evenings instead. He dealt with his own disappointment by setting up an innovative school in 2002 to prepare underprivileged students for the IIT JEE examination. Super 30 has an astonishing success rate and on an average, twenty-seven to twenty-eight of the thirty students crack the exam every year. Stirring and heart-wrenching, this is the extraordinary story of a visionary who has elevated these bright sparks and, through education, given them hope to rise above crippling poverty.

I thought it was all over until I met her again. I was hurting myself to forget her, and yet I kept falling in love. I saw her, smiling and happy with him. As the tears in my eyes pleaded for freedom, I waited, for her, to give me that one smile... Sometimes life gives you a thousand reasons to fall in love, and just one reason to fall apart. I had stepped on it, and, I had to wait for three years to rediscover the soul within me. But, what happened to her in these three years? Does she love me still? This intense love story will make your heart fall in love over and over again.

On 23rd March 2021, Anand Kumar (name changed) visited a blood donation camp to donate a unit of blood. The author has visualized the journey and the incidents occurred on the day and also tried to convince the people of this country to become a regular donor of blood as it not only fulfils the requirement of the patients, even it keeps the donor more healthy. However, the author doesn't take responsibility that a regular donor is always more healthy in comparison to a person who doesn't do the same. It is therefore requested to the readers to consult the doctor before blood donation and follow the doctor's suggestion. This story is based on a real story, however, names of persons, political parties, trust, villages, newspapers, etc. are changed to hide the identity and any resemblance to anyone is just a coincidence. The author's main purpose is to encourage Indians to participate in the welfare of the society and country to uplift it up to a standard level.

This book explores the lives, inventions, discoveries, and significant work of three extraordinary European inventors with noteworthy links to the great Thomas Alva Edison – Alessandro Volta, Nikola Tesla, and Eric Tigerstedt. It explores the business and scientific legacies that these men have contributed to the modern world. Despite prejudices, ill health, financial stringency, geopolitical situations, business rivalries, and in many cases just awful luck, they remained determined to deliver extraordinary scientific and technological developments to a skeptical and unappreciative world. This book is a testament to anyone pursuing their technological dreams for the benefit of society, and will enhance the literature for scholars, researchers, and the well-informed reader with an interest in science, technology, and the personalities involved in history.
