In 1991 Walter L. Buenger and the late Robert A. Calvert compiled a pioneering work in Texas historiography: *Texas Through Time*, a seminal survey and critique of the field of Texas history from its inception through the end of the 1980s. Now, Buenger and Arnolde De León have assembled an important new collection that assesses the current state of Texas historiography, building on the many changes in understanding and interpretation that have developed in the nearly twenty years since the publication of the original volume. This new work, *Beyond Texas Through Time*, departs from the earlier volume's emphasis on the dichotomy between traditionalism and revisionism as they applied to various eras. Instead, the studies in this book consider the topical and thematic understandings of Texas historiography embraced by a new generation of Texas historians as they reflect analytically on the work of the past two decades. The resulting approaches thus offer the potential of informing the study of themes and topics other than those specifically introduced in this volume, extending its usefulness well beyond a review of the literature. In addition, the volume editors' introduction proposes the application of cultural constructionism as an important third perspective on the thematic and topical analyses provided by the other contributors. *Beyond Texas Through Time* offers both a vantage point and a benchmark, serving as an important reference for scholars and advanced students of history and historiography, even beyond the borders of Texas.

Syed Alam Khundmiri (1922-83) was an important intellectual figure of his times, a true humanist with rare philosophical insights ranging over a wide field. The volume brings together Khundmiri's seminal essays which set out his dominant concerns: Marxism, with its indifference to questions of minorities in nationalism; existentialism, which he saw as being closed off to the problems of community; and Islam, which he examined in relation to history and notions of time and change. Overall, this absorbing collection of essays encapsulates Khundmiri's dual project of situating Islam in the modern context and scrutinizing the modern in the light of Islam. Particularly relevant in the present context of the increasing sacralization of politics, it will be read with great interest by students and scholars of philosophy, history, sociology, Islamic studies, Marxism, comparative religion, cultural studies, and political and social theory, as well as by the aware and concerned lay reader.

Inner Asia - in premodern times the little-known land of nomads and semi-nomads - has moved to the world's front page in the 20th century as the complex struggles for the future of Afghanistan, Soviet Central Asia, Tibet and other territories make clear. But because Inner Asia as a whole is divided among several states politically and among area specialists academically, broad perspectives on recent events are difficult to find. This work treats the region as a single unit, providing both an account of the region's past and an analysis of its present and its prospects in a thematic, rather than a strictly country-by-country manner.

How do you put the "public" in public management? How can the traditional ethos of professionalism and technical expertise be reconciled with norms of representation and citizen participation at a time when technology is transforming communication between citizens and government - in some ways enhancing the exchange and in other ways complicating it? "Modernizing Democracy: Innovations in Citizen Participation" points the way. Written for public administration professionals, scholars, and students interested in citizen participation, it brings together new analyses of innovative practices, from hands-on community learning and focus groups to high-tech information systems and decision support technologies. The expert contributors illuminate the various roles that public administrators and leaders can play in fostering constructive, meaningful citizen involvement at all stages of the public policy process - from initiation and planning to feedback on public agency performance.

An Iranian scholar chronicles the life and legacy of the last Shah of Iran, including his role in the creation of the modern Islamic republic.

The counterinsurgency (COIN) paradigm dominates military and political conduct in contemporary Western strategic thought. It assumes future wars will unfold as "low intensity" conflicts within rather than between states, requiring specialized military training and techniques. COIN is understood as a logical, effective, and democratically palatable method for confronting insurgency—a discrete set of practices that, through the actions of knowledgeable soldiers and under the guidance of an expert elite, creates lasting results. Through an extensive investigation into COIN's theories, methods, and outcomes, this book

undermines enduring claims about COIN's success while revealing its hidden meanings and effects. Interrogating the relationship between counterinsurgency and war, the authors question the supposed uniqueness of COIN's attributes and try to resolve the puzzle of its intellectual identity. Is COIN a strategy, a doctrine, a theory, a military practice, or something else? Their analysis ultimately exposes a critical paradox within COIN: while it ignores the vital political dimensions of war, it is nevertheless the product of a misplaced ideological faith in modernization.
