Asia Al Centro

Cina, Giappone, India: gli autori illustrano e spiegano le specificità delle potenze asiatiche con un approccio attento alla geopolitica, agli effetti dell'interdipendenza economica prodotta (o imposta) dalla globalizzazione e soprattutto alle peculiarità culturali come fattori essenziali dell'identità politica delle nazioni. Si fa chiara allora la specificità della «via indiana» e la diversità delle risposte date dalle due potenze confuciane, Cina e Giappone, alla sfida modernizzante del XIX secolo e a quella attuale della globalizzazione. Aggiornato alle ultime vicende, con un'attenzione particolare al nuovo corso della politica giapponese imposto dal primo ministro Shinzo _ Abe, e all'ascesa della Cina come nuova grande potenza, il libro continua a essere un classico imprescindibile per comprendere il mondo asiatico.

Asia Al Centro

Since the 1950s, Japan-Europe relations have been characterised by a mutual coldness in terms of diplomatic dialogue, punctuated by a number of trade disputes. This book analyses the development of the political and diplomatic relationship between Japan and Europe, and shows that – especially during the Cold War years – whilst they share a wide range of political values and goals, the quality of diplomatic relations has often been sacrificed to both overcome trade issues and as a result of systemic factors. Focusing on the institutionalization of relations between Japan and the EU, this book examines both the historical-diplomatic dimension and political-strategic discourse. It traces the historical development of the relationship from the post-war years, to the signing of the Japan-EU action plan in 2001, which marked a key turning point in the relationship. It goes on to examine the achievements and criticisms of ASEM, the Asia-Europe Meeting, which whilst meeting successfully for the past sixteen years, has also been condemned as little more than a talking shop. Crucially, Oliviero Frattolillo's analysis clearly demonstrates how the interaction between Japan and the EU has been constructed on the basis of their perceptions of each other, thus underlining the inherent impact of different political identities, cultures and values on international relations. Providing a keen insight into Japan-EU relations, this book will appeal to students and scholars of Japanese and European history and politics, as well as those interested in the history of international relations and security studies.

As memories of the savage conflict inaugurated by the attack on Pearl Harbor recede, the ethical foundations that influenced postwar interpretations of Japan's role during the Cold War era are crumbling on different fronts. Retracing Japanese history during the Sixties, this book locates the country's role in Cold War history against the backdrop of the twentieth century, contextualizing older trends that shaped postwar changes. It also places Cold War Japan in the global context of America's shifting hegemony and the corresponding structure of the international system. Given its nuanced approach, this book will prove instrumental for students and researchers working in studies of Cold War history, Japanese history, American history and international history.

Asia Al Centro

The end of the cold war was thought to signal the triumph of Western capitalism over Communism. In Maonomics: Why Chinese Communists Make Better Capitalists than We Do, Napoleoni argues just the opposite: what we are witnessing instead is the beginning of the collapse of capitalism and the victory of "communism with a profit motive." Maonomics charts the prodigious ascent of the Chinese economic miracle and the parallel course of the West's ongoing insistence on misconstruing China and its economy even as we acknowledge its growing influence and importance. Maonomics is a warning call whereby Western governments can avoid economic collapse by learning how to understand more clearly what the lessons of the Chinese economy really are. Based on first-hand reporting from China during frequent visits in the last several years, Maonomics lends credence to the Chinese view and translates it for Western readers. For example, the Chinese too are attached to their vision of democracy, but it is differnt from ours. It isn't focused as much on voting as it is economic opportunity and the fair distribution of wealth and prosperity. Napoleoni also separates failed Leninist political ideology from true Marxist theory, showing that Marx's writings do not reject profit so long as it is used to benefit the people. Marx's dictatorship of the proletariat is being realized in China, she argues, where giant steps forward are being made in the name of progress and the wellbeing and prosperity of the Chinese people. Looking at the Chinese economy up close, any economist would be hard pressed to say that they are not on the right track. Here Loretta Napoleoni offers a front row seat on the greatest show on earth: the peaceful economic revolution that is shifting the balance of power in the world from West to East.

In the late nineteenth century, Japan was the only non-Western country to have successfully faced the challenges of Westernization. At the end of the Meiji Era, just three decades after the end of the country's feudal age, it became Great Britain's ally, while its soldiers were deployed in Beijing, operating alongside the great European powers. Meanwhile, in Japan, the perception of a scientifically and technologically advanced West came to be imbued by negative connotations, generated by the threatening Western presence in Asia. In order to avoid succumbing to the European imperialist yoke, Japan has itself gradually converted its international status by embracing an imperialistic identity. The new image of the world responding to the current historical situation could only result from a philosophy immersed in historicity, far from its metaphysical dimension. In a philosophy mediated by history, self-awareness would have coincided with the "historical manifestations of history". Based on these premises, the Ch??k?ron group seemed to have presented Japan's hegemonic aspirations as an expression of its "real historical manifestation". This sounded like an explicit declaration of ideologically supporting the country's involvement in the war. But what is the meaning that the participants in the debates attributed to the idea of Japan's "real historical manifestation"? The answer lies in a moral obligation that the country saw as "the duty" of world history: overcoming modern civilization while promoting a new culture.

This book is about China's ambitions in its most complex and internationally visible space endeavor, namely its human space exploration programme. It provides a comprehensive reflection on China ?s strategic direction and objectives in space, including in particular those set forth in its human spaceflight programme and analyses the key domestic and external factors affecting the country's presumed manned lunar ambitions. The objective of the book is to disentangle the opportunities and challenges China ?s space ambitions are creating for other spacefaring nations and for Europe in particular. It therefore includes an in-depth analysis of possible European postures towards China in space exploration and seeks to stimulate a debate on future space strategies in the broader context of world politics.

This book presents a series of papers in honour of Sandro Salvatori divided into three main sections reflecting his long years of work in Middle Asia, his time in Italy as an officer of the Archaeological Superintendency (Ministry of Cultural Heritage), and finally his studies on the prehistory of north-eastern Africa.
