OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There's just one problem: most of these solutions are making things worse. Creativity isn't produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet, they are tearing us apart. When we're told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? WE HAVE FORGOTTEN HOW TO FLOAT. The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work—why we believe that what we do determines who we are. Hustle and Float explores how our work culture creates contradictions between what we think we want and what we actually need, and points the way to a more humane, more sustainable, and, yes, more creative, way of working and living.

Few sporting classics last 100 years and fewer still continue to attract global interest in the way the Isle of Man TT does.The Tourist Trophy originated as a car race in 1904 but has been the domain of motorcycles since 1907. It is widely regarded as the last of the great road races in motor sport, annually drawing thousands of dedicated fans to a gem of an island in the middle of the Irish Sea.Steeped in nostalgia and brimming with atmosphere, controversy and spine-chilling action, the magic of the oldest race on the international calendar is captured in a neatly-sized book packed with 120 monochrome and full colour images.TT Centenary goes right back to the original St John's Course and also includes images from the Clype Course used for a short period in the 1950's. The awesome 37.7 mile Snaefell Mountain Course, which was the home of the British Motorcycle Grand Prix for four decades, remains the ultimate challenge to every discerning road racer.

This handbook was developed for use in workshops designed to prepare selected persons for the roles of DACUM facilitator and/or coordinator. The resulting occupational profile or DACUM chart serves as a research base around which new competency-based education or training programs can be developed or existing programs updated.
