Automobile Insurance Made Simple is a comprehensive, easy to understand consumer's guide to auto insurance. It explains the basic coverages provided by most auto insurance policies, along with simple and clear examples. The book explains how insurance companies determine how much you pay for auto insurance. Once you have this basic understanding, it's easy to see how you can save money on your auto insurance. The book contains actual rating examples and premium charges with easy-to-follow charts and graphs. It provides tips on how to shop, what discounts to look for, and how not to become a victim of insurance fraud. It explains coverages. This book is a valuable resource worth coming back to time and again. An absolute must buy if you live in New Jersey! The \$20 investment you make in this book can save you hundreds of dollars in just one year, even thousands of dollars over the course of your lifetime.

By several measures, insurance for you, your family, your home, and your car continues to rise at the fastest rate in our history. In 2005 (the latest year data are available), total national health expenditures rose 7.9 percent - more than three times the rate of inflation. Nearly 50 million Americans are uninsured for healthcare. According to Insurance Information Institute projections, the average annual expenditure for auto insurance in 2006 was \$851. Millions of drivers have no auto insurance. The average expenditure for homeowners insurance was \$729, according to a February 2007 report by the National Association of Insurance Commissioners (NAIC). Insurance takes a huge bite out of the average American's monthly budget, and as stated above, many Americans simply forgo insurance because they consider it out of reach. Shopping for insurance requires more effort than many people want to devote to it. They simply grab the first price they come across or accept routine rate increases when it is important to compare not only the price but also coverage and exclusions among carriers. In this easy to read and comprehensive new book you will learn hundreds of ways to secure and or reduce your health, automobile, life, and home insurance costs. If you do not have or cannot afford insurance, we will show you how to get it at a price you can afford. The Internet and technology have opened up a great new way to search for low cost insurance services; we will give you the Web sites, tell you what to look for and to look out for. There is a great deal you can do right now to cut insurance costs. For example, did you know that installing a theft tracking device in your car can save you up to 35% on your auto insurance and that your credit history can dramatically affect your auto insurance premium. Recent studies have shown that more than 90% of insurers use credit information to create an "insurance risk score", which they then use as a factor to determine your insurance rate. Add a simple home security system to monitor your home, and your insurance rates may be discounted up to 30%, depending upon where you live. Your insurance could end up costing you more if you choose to make monthly payments rather than pay the entire premium annually. Notify your agent if you retire, your children go to school, or you start working from home (when you are not travelling as much your rates will go down). Have you stopped smoking? Lost weight? Started exercising? All of these efforts can have a dramatic effect on your insurance rates. Insurance topics covered in this book are How Insurance Works, Insurance Company Rating, National and Local Firms, Auto, Health, and Disability Insurance, along with work sheets and forms to assist you in your search for the best coverage at the lowest price.

This combination textbook and workbook, explains each phase of the medical claim cycle, from the time the patient calls for an appointment until the financial transaction for the encounter is completed. Coverage includes types of insurance payers, basic coding and billing rules, and standard requirements for outpatient billing using the CMS-1500 claim form. It also emphasizes legal aspects related to each level of the medical claim cycle and the importance of the medical office employee, showing their responsibility for and impact on successful reimbursement. 3 separate chapters offer coverage of the basic concepts of medical coding. A comprehensive overview of the CMS-1500 claim form with step-by-step guidelines and illustrations thoroughly covers reimbursement issues and explains the billing process. Includes detailed information on various insurance payers and plans including Medicare, government medical plans, disability plans, private indemnity plans, and managed care. Stop & Review sections illustrate how the concepts presented in each chapter relate to real-life billing situations. Sidebars and Examples highlight key concepts and information related to the core text lesson. A companion CD-ROM contains sample patient and insurance information that readers can use to practice completing the accompanying CMS-1500 claim form, as well as a demonstration of Altapoint practice management software. Features completely updated information that reflects the many changes in the insurance industry. Contains a new chapter on UB-92 insurance billing for hospitals and outpatient facilities. Includes a new appendix, Quick Guide to HIPAA for the Physician's Office, to provide a basic overview of the important HIPAA-related information necessary on the job.
