Turkish republicanism is commonly thought to have originated with Mustafa Kemal

Atatürk and the founding of modern Turkey in 1923, and understood exclusively in terms of Kemalist ideals, characterized by the principles of secularism, nationalism, statism, and populism. Banu Turnaoğlu challenges this view, showing how Turkish republicanism represents the outcome of centuries of intellectual dispute in Turkey over Islamic and liberal conceptions of republicanism, culminating in the victory of Kemalism in the republic's formative period. Drawing on a wealth of rare archival material, Turnaoğlu presents the first complete history of republican thinking in Turkey from the birth of the Ottoman state to the founding of the modern republic. She shows how the Kemalists wrote Turkish history from their own perspective, presenting their own version of republicanism as inevitable while disregarding the contributions of competing visions. Turnaoğlu demonstrates how republicanism has roots outside the Western political experience, broadening our understanding of intellectual history. She reveals how the current crises in Turkish politics—including the Kurdish Question, democratic instability, the rise of radical Islam, and right-wing Turkish nationalism—arise from intellectual tensions left unresolved by Kemalist ideology. A breathtaking work of scholarship, *The Formation of Turkish Republicanism* offers a strikingly new narrative of the evolution and shaping of modern Turkey.

This edited volume analyzes how migration, the conformation of urban areas, and globalization impact Latin American geopolitics. Globalization has decisively influenced Latin American nationhood and it has also helped create a global region with global cities that are the result of the urbanization process. Also, globalization and migration are changing Latin America's own vision as a collective community. This book tackles how migration triggers concerns about security, which lead to policies based on the protection of borders as a matter of national security. The contributors argue that economic regionalization-globalization promotes changes in the social and economic geography which refer to social phenomena, the dynamic of social classes and their spatial implications, all of which may impact economic growth on the region. The project will appeal to a wider audience including political scientists, scholars, researchers, students and non-academics interested in Latin American geopolitics.
