Late one winter afternoon in the small town of Chosen, New York, professor George Clare knocks on his neighbor's door with terrible news: he returned from work to find his wife, Catherine, murdered in their bed. Someone took an ax to her head while their three-year-old daughter, Fanny, played alone in her room across the hall. Recent transplants to Chosen, the Clares have not received the warmest welcome: once a thriving dairy farm, their home is haunted by the tragedy that left the former owner's three sons orphaned and adrift. As one dark secret peels away to reveal others—and as the Clare marriage reveals itself to have a sinister darkness that rivals the farm's history—Elizabeth Brundage offers a rich and complex portrait of the scars that can haunt a community for generations and the dark longings inside each and every one of us that drive us to do inexplicable things.

Moral Motivation presents a history of the concept of moral motivation. The book consists of ten chapters by eminent scholars in the history of philosophy, covering Plato, Aristotle, later Peripatetic philosophy, medieval philosophy, Spinoza, Locke, Hume, Kant, Fichte and Hegel, and the consequentialist tradition. In addition, four interdisciplinary "Reflections" discuss how the topic of moral motivation arises in epic poetry, Cicero, early opera, and Theodore Dreiser. Most contemporary philosophical discussions of moral motivation focus on whether and how moral beliefs by themselves motivate an agent (at least to some degree) to act. In much of the history of the concept, especially before Hume, the focus is rather on how to motivate people to act morally as well as on what sort of motivation a person must act from (or what end an agents acts for) in order to be a genuinely ethical person or even to have done a genuinely ethical action. The book shows the complexity of the historical treatment of moral motivation and, moreover, how intertwined moral motivation is with central aspects of ethical theory.
