The latest edition of Quarterly Current Affairs Vol. 3 - July to September 2020 for Competitive Exams now comes with a Current Affairs eCourse powered by Disha Educators. The Book is a unique handy magbook as it gives the complete update of the third Quarter (July to September) of 2021. # This new edition now comes with an eCourse comprising of Jhalak - Weekly & Monthly Updates, Paridrashaya, Vishleshan & Vivechana. # This edition includes Past Questions of SSC CGL, RRB NTPC, UPPET, CDS & NDA 2021; # Practice Questions for IAS Mains; Essays; Case Studies for General Studies etc. # The book talks of all the recent developments in the field of Polity, Economics, Science & Technology, Sports, Art & Culture etc. # Exclusive coverage of latest Topics like Tokyo Olympics, Afghanistan Crisis, Bills & Acts, Green Hydrogen Mission, G20, UNSC, etc. # The book has been updated with an Exam Special Update - Banking, Railways, Agriculture, Environment, Science & Technology. # This book would prove to be an asset for all students aspiring for the different competitive exams. # The book uses unique analytical tools like Game Changers, Causes & Effects, Quote & Unquote, At a Glance, Emerging Trends, SWOT, Mind Maps, Essays, Essay Ideas etc.

Yeast-based biotechnology traditionally regards the empirical production of fermented drinks and leavened bread, processes which surprisingly keep posing challenges and fuelling research. But yeasts nowadays also provide amenable cell factories, producing bulk and fine chemicals and molecules, and are increasingly used as tools in processes as diverse as food preservation or bioremediation. Importantly, yeasts are excellent models of cell and molecular biology for higher eukaryotes, including humans, contributing with key discoveries to understand processes and diseases. All taken, yeast-related business is worth billions, critically contributing to the economical welfare of many differently developed countries. This book provides some insights into aspects of yeast science and biotechnology less frequently addressed in the literature but nonetheless decisive to improve knowledge and, accordingly, boost up yeast-based innovation.

William Louis Poteat (1856-1938), the son of a conservative Baptist slaveholder, became one of the most outspoken southern liberals during his lifetime. He was a rarity in the South for openly teaching evolution beginning in the 1880s, and during his tenure as president of Wake Forest College (1905-1927) his advocacy of social Christianity stood in stark contrast to the zeal for practical training that swept through the New South's state universities. Exceptionally frank in his support of evolution, Poteat believed it represented God at work in nature. Despite repeated attacks in the early 1920s, Poteat stood his ground on this issue while a number of other professors at southern colleges were dismissed for teaching evolution. One of the few Baptists who stressed the social duties of Christians, Poteat led numerous campaigns during the Progressive era for reform on such issues as public education, child labor, race relations, and care of the mentally ill. His convictions were grounded in a respect for high culture and learning, a belief in the need for leadership, and a deep-seated faith in God. Poteat also embodied the struggle with the intellectual compromises that tortured contemporary social critics in the South. Though he took a liberal position on numerous issues, he was a staunch advocate for prohibition and became a strong supporter of eugenics, a position he adopted after following his beliefs in a natural hierarchy and absolute moral order to their ultimate conclusion. Randal Hall's revisionist biography presents a nuanced portrait of Poteat, shedding new light on southern intellectual life, religious development, higher education, and politics in the region during his lifetime.

About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht. We received 525 abstracts for the conference, divided in thematic poster sessions and platform presentations. Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences. During and after the conference about 250 papers were submitted for publication in the conference proceedings, leaving us little time for a post-conference depression. Despite the large number of papers, the editors have attempted to review and edit the papers as care fully as possible. Occasionally, however, correspondence exceeded reasonable deadlines, preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished, we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to - occasionally tedious - editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flippo-Berger whose expertise with desk top publishing and perseverance was a great help.

• Strictly as per the Semester-2 syllabus for Board 2022 Exams (March-April) • Includes Questions of the both -Objective & Subjective Types Questions • Chapterwise and Topicwise Revision Notes for in-depth study • Modified & Empowered Mind Maps & Mnemonics for quick learning • Unit wise Self -Assessment Tests • Concept videos for blended learning • Previous Years' Board Examination Questions and Marking scheme Answers with detailed explanation to facilitate exam-oriented preparation. • Examiners comments & Answering Tips to aid in exam preparation. • Includes Topics found Difficult & Suggestions for students. • Includes Academically important Questions (AI) • Dynamic QR code to keep the students updated for 2022 Exam paper or any further ICSE notifications/circulars

A Chicago Tribune "Best Books of 2014" • A Slate "Best Books 2014: Staff Picks" • A St. Louis Post-Dispatch "Best Books of 2014" The fascinating story of one of the most important scientific discoveries of the twentieth century. We know it simply as "the pill," yet its genesis was anything but simple. Jonathan Eig's masterful narrative revolves around four principal characters: the fiery feminist Margaret Sanger, who was a champion of birth control in her campaign for the rights of women but neglected her own children in pursuit of free love; the beautiful Katharine McCormick, who owed her fortune to her wealthy husband, the son of the founder of International Harvester and a schizophrenic; the visionary scientist Gregory Pincus, who was dismissed by Harvard in the 1930s as a result of his experimentation with in vitro fertilization but who, after he was approached by Sanger and McCormick, grew obsessed with the idea of inventing a drug that could stop ovulation; and the telegenic John Rock, a Catholic doctor from Boston who battled his own church to become an enormously effective advocate in the effort to win public approval for the drug that would be marketed by Searle as Enovid. Spanning the years from Sanger's heady Greenwich Village days in the early twentieth century to trial tests in Puerto Rico in the 1950s to the cusp of the sexual revolution in the 1960s, this is a grand story of radical feminist politics, scientific ingenuity, establishment opposition, and, ultimately, a sea change in social attitudes. Brilliantly researched and briskly written, The Birth of the Pill is gripping social, cultural, and scientific history.
