The ASP.NET MVC 5 Framework is the latest evolution of Microsoft's ASP.NET web platform. It provides a high-productivity programming model that promotes cleaner code architecture, test-driven development, and powerful extensibility, combined with all the benefits of ASP.NET. ASP.NET MVC 5 contains a number of advances over previous versions, including the ability to define routes using C# attributes and the ability to override filters. The user experience of building MVC applications has also been substantially improved. The new, more tightly integrated, Visual Studio 2013 IDE has been created specifically with MVC application development in mind and provides a full suite of tools to improve development times and assist in reporting, debugging and deploying your code. The popular Bootstrap JavaScript library has also now been included natively within MVC 5 providing you, the developer, with a wider range of multi-platform CSS and HTML5 options than ever before without the penalty of having to load-in third party libraries.

'Natural Resources: Neither Course nor Destiny' brings together a variety of analytical perspectives, ranging from econometric analyses of economic growth to historical studies of successful development experiences in countries with abundant natural resources. The evidence suggests that natural resources are neither a curse nor destiny. Natural resources can actually spur economic development when combined with the accumulation of knowledge for economic innovation. Furthermore, natural resource abundance need not be the only determinant of the structure of trade in developing countries. In fact, the accumulation of knowledge, infrastructure, and the quality of governance all seem to determine not only what countries produce and export, but also how firms and workers produce any good.

By highlighting relations between experimental and theoretical work, this volume explores new ways of addressing one of the central challenges in the study of language and cognition. The articles bring together work by leading scholars and younger researchers in psychology, linguistics and philosophy. An introductory chapter lays out the background on concept composition, a problem that is stimulating much new research in cognitive science. Researchers in this interdisciplinary domain aim to explain how meanings of complex expressions are derived from simple lexical concepts and to show how these meanings connect to concept representations. Traditionally, much of the work on concept composition has been carried out within

separate disciplines, where cognitive psychologists have concentrated on concept representations, and linguists and philosophers have focused on the meaning and use of logical operators. This volume demonstrates an important change in this situation, where convergence points between these three disciplines in cognitive science are emerging and are leading to new findings and theoretical insights. "This intimate, moving, and timely collection of essays points the way to a world in which the burden of grief is shared, and pain is reconfigured into a powerful force for social change and collective healing." –Astra Taylor, author *The People's Platform* "A primary message here is that from tears comes the resolve for the struggle ahead." –Ron Jacobs, author of *Daydream Sunset* "Rebellious Mourning uncovers the destruction of life that capitalist development leaves in its trail. But it is also witness to the power of grief as a catalyst to collective resistance." –Silvia Federici, author of *Caliban and the Witch* We can bear almost anything when it is worked through collectively. Grief is generally thought of as something personal and insular, but when we publicly share loss and pain, we lessen the power of the forces that debilitate us, while at the same time building the humane social practices that alleviate suffering and improve quality of life for everyone. Addressing tragedies from Fukushima to Palestine, incarceration to eviction, AIDS crises to border crossings, and racism to rape, the intimate yet tenacious writing in this volume shows that mourning can pry open spaces of contestation and reconstruction, empathy and solidarity. With contributions from Claudia Rankine, Sarah Schulman, David Wojnarowicz, Leanne Betasamosake Simpson, David Gilbert, and nineteen others. Cindy Milstein is the author of *Anarchism and Its Aspirations*, co-author of *Paths toward Utopia: Graphic Explorations of Everyday Anarchism*, and editor of the anthology *Taking Sides: Revolutionary Solidarity and the Poverty of Liberalism*.
