Written for the mid to high-level developmental reading course, [Bridging the Gap](#), by Brenda Smith continues to be the #1 textbook choice of developmental reading educators. Over the course of several editions, this theme has been broadened by linking textbook readings to recent news in the popular press and adding material on critical thinking and the Internet. A hallmark of the text, the end-of-chapter readings represent three different reading levels (9th-10th, 10th-12th, 12th+) to permit individualization of assignments to meet varying student needs. A variety of academic disciplines are represented throughout, including psychology, history, biology, business, allied health, English literature, and more.

This book provides an overview of police-community relations. First, this book examines elderly people and some of their concerns. To best serve the public, the police must understand the concerns of the public. Second, this book discusses various criminal theories and their limitations. Theories are effective for understanding problems and for solving the problems. However, every theory has a limitation. Third, this book discusses ethical systems and police department orientations, which are used to judge good police officer behavior. Fourth, this book discusses communication, deviance, and dealing with disadvantaged individuals. Fifth, this book discusses hot spots, crime prevention through environmental design, community policing, and community intervention. Finally, this book discusses how to estimate the implementation of a police-community relations program and provides several examples of how to evaluate a program via academic research.

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's The Prize and Dana Goldstein's The Teacher Wars, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But The Knowledge Gap isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

Human resource professionals are an essential part of an organization; by helping to establish a rapport between employees and their managers and providing individual support, they ensure the overall well-being and success of an establishment. However, in certain sectors, such as academia or industrial settings, their role still remains unclear. [Bridging the Scholar-Practitioner Gap in Human Resources Development](#) examines the knowledge breach in the role of human resources professionals and the pivotal role they play in an organization. Featuring timely research, future implications, and practical applications of theoretical assumptions, this publication is a pivotal source for professionals, practitioners, academics, and researchers interested in the impact human resources specialists have in organizational settings.

In this collective volume, we seek to bridge gaps between research and practice in the teaching and learning of English for Specific Purposes (ESP) with a set of strong research-based contributions drawing on a wide range of ESP contexts. It offers new theoretical and pedagogical insights for ESP practitioners and researchers alike, going beyond descriptions of ESP situations and programmes to bring in sound research design and data analysis which are firmly anchored in previous ESP research. The nine papers in this collection cover a variety of ESP domains, from medicine, technical science, and engineering to social sciences and the humanities, in order to encapsulate current trends and new developments in ESP teaching and learning research in Europe.

"Haudan's approach helps organizations bring strategies to life by engaging the hearts and minds of their people. " -Marcus Buckingham, bestselling author of Go Put Your Strengths to Work Almost any business leader will admit that creating a strategy is far easier than executing it. That's because the majority of organizations don't know how to bridge the canyons that exist between executives, managers, and front-line employees. Most strategic initiatives fail when a company tries to execute strategy despite its people rather than through them. As CEO of consultancy Root Learning, Jim Haudan has more than twenty years experience helping businesses bridge these canyons and achieve their strategic goals. Here, he shares his secrets for driving this strategic execution. Refreshingly accessible, this important book presents executives, managers, and team leaders with a proven, effective way to communicate, empower, and motivate employees at every level of an organization. Through stories, illustrations, and insightful observations Haudan explores the concept of engagement in business--from the " roots of engagement " to the six reasons why so many workers rank themselves as disengaged to the keys to unlocking engagement in any organization. He also includes a framework for implementing the process of strategically engaging employees as well as a self-assessment for checking your own company's level of strategic engagement. The Art of Engagement equips you with a range of tools--sketches, illustrations, and highly visual " learning maps " --to help employees speak the same language, see from the same point of view, and connect their individual actions to the success of the whole company. Included are: Engaging visual learning tools designed to help you communicate more effectively with your workforce Proven methods for successfully engaging employees at every level of an organization Real-world case studies of such organizations as Harley-Davidson, Pepsi Cola, and Blockbuster A strategy may look perfect on paper, but it's worthless if leaders forget that human beings have to implement it. The Art of Engagement arms you with the knowledge and the know-how to engage your employees and drive effective strategic execution.
