These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD-10-CM: the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), CMS, and NCHS. These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided

Section 4 Guided Reading

within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that

Section 4 Guided Reading

are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated.

This guidance will assist processors of fish and fishery products in the development of their Hazard Analysis Critical Control Point (HACCP) plans. Processors of fish and fishery products will find info. that will help them identify hazards that are associated with their products, and help them formulate control strategies. It will help consumers understand commercial seafood safety in terms of hazards and their controls. It does not specifically address safe handling practices by consumers or by retail estab., although the

professionals with the knowledge and skills required for all aspects of managing cancer family history. This includes taking an accurate cancer family history and drawing a family tree; understanding cancer biology, basic cancer genetics and the genes involved in hereditary breast, ovarian, prostate, colorectal, gastric and related gynaecological cancers and rare cancer predisposing syndromes; assessing cancer risk and communicating risk information; early detection and risk reducing measures available for those at increased risk and managing individuals with hereditary cancer. Drawing on experiences of health professionals, *Genetics for Health Professionals in Cancer Care* discusses the challenges raised and provides practical advice and insight into what happens when a patient is referred for genetic counselling and genetic testing, including the
