Here's everything you should have been taught in sex education, fascinatingly presented with all the science fact, and a light-hearted touch. An Everyman's humorous look at the real differences-biological, historical, psychological-between men and women . . . this fact-based but fun and provocative book provides insight into what really drives

behavior and interactions between men and women. Men talk about women to men. Women talk about men to women. Men and women talk to each other (or try to) about relationships. It's Not You, It's Biology provides insight, ammunition, snappy comebacks, and interesting cocktail party banter for everyone who ever wondered why we do what we do vis-a-vis the opposite sex.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their

lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of

Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

The most respected and accomplished authorship team in high school biology, Ken Miller and Joe Levine are real scientists and educators who have dedicated their lives to scientific literacy. Their experience, knowledge, and insight guided them in creating this breakaway biology program --
