Pagination ¶ CodeIgniter provides a very simple, but flexible pagination library that is simple to theme, works with the model, and capable of supporting multiple paginators on a single page. Loading the Library ¶ Like all services in CodeIgniter, it can be loaded via Config\Services, though you usually will not need to load it manually:

Pagination ¶ CodeIgniter 4.0.4
documentation

```
$this->pagination->initialize($config);  
echo
```

```
$this->pagination->create_links();
```

Notes: The \$config array contains your configuration variables. It is passed to the \$this->pagination->initialize

function as shown above. Although there are some twenty items you can configure, at minimum you need the three shown.

Pagination Class : CodeIgniter User Guide

It is passed to the `$this->pagination->initialize()` method as shown above. Although there are some twenty items you can configure, at minimum you need the three shown. Here is a description of what those items represent: `base_url` This is the full URL to the controller class/function containing your pagination. In the example above, it is pointing to a controller called `Test` and a function called `page`.

In order to use pagination in CodeIgniter, the first thing you need to do is to load the pagination library. And we can do it by using `$this->load->library('pagination')` . We've also loaded the URL helper so that we can use global helper functions provided by that helper.

Pagination in CodeIgniter: The Complete Guide

```
$this->pagination->initialize($config);  
initializes the pagination library using the config array value that we defined and assign the above values to. $page = ($this->uri->segment(2)) ? $this->uri->segment(2) : 0; checks if the skip number has been set in the second segment of the URI and if its not set then the value 0 is assigned to the variable $page
```
