The Briggs and Stratton 675 Series is the type of lawnmower you call in when others can't get the job done. To speak in mob terms, the weaker engines would be Ray Liotta, while the 675 Series would be Joe Pesci. He'll smack the mouthy weeds on the head, throw them in the trunk and they'll never be seen again.

DACUM or "Developing A CurriculUM" is a relatively new and innovative approach to occupational analysis. This handbook was developed for use in workshops designed to prepare selected persons for the roles of DACUM facilitator and/or coordinator. The resulting occupational profile or DACUM chart serves as a research base around which new competency-based education or training programs can be developed or existing programs updated.

The aim of this book, with its superb step by step photographs and detailed diagrams is to enable every owner to understand the workings of an outboard motor (2 or 4 stroke) and be able to fix it with relative ease. It includes: an explanation of the different parts that make up the engine and how they interact; how fuel is transformed into propulsion; regular maintenance and repair worksheets to help even the most mechanically ignorant to work on their outboard engine with confidence; the most common causes of breakdown; troubleshooting tables to allow you to diagnose and fix the most common engine problems and advice on how to winterize your outboard in one short afternoon. After reading this book, your outboard will no longer be a potential bother to you but an ally for better boating.
