It is, at heart, a book about creativity—but it is also, as Pixar co-founder and president Ed Catmull writes, "an expression of the ideas that I believe make the best in us possible." For nearly twenty years, Pixar has dominated the world of animation, producing such beloved films as the Toy Story trilogy, Monsters, Inc., Finding Nemo, The Incredibles, Up, WALL-E, and Inside Out, which have gone on to set box-office records and garner thirty Academy Awards. The joyousness of the storytelling, the inventive plots, the emotional authenticity: In some ways, Pixar movies are an object lesson in what creativity really is. Here, in this book, Catmull reveals the ideals and techniques that have made Pixar so widely admired—and so profitable. As a young man, Ed Catmull had a dream: to make the first computer-animated movie. He nurtured that dream as a Ph.D. student at the University of Utah, where many computer science pioneers got their start, and then forged a partnership with George Lucas that led, indirectly, to his co-founding Pixar in 1986. Nine years later, Toy Story was released, changing animation forever. The essential ingredient in that movie's success—and in the thirteen movies that followed—was the unique environment that Catmull and his colleagues built at Pixar, based on leadership and management philosophies that protect the creative process and defy convention, such as: • Give a good idea to a mediocre team, and they will screw it up. But give a mediocre idea to a great team, and they will either fix it or come up with something better. • If you don't strive to uncover what is unseen and understand its nature, you will be ill prepared to lead. • It's not the manager's job to prevent risks. It's the manager's job to make it safe for others to take them. • The cost of preventing errors is often far greater than the cost of fixing them. • A company's communication structure should not mirror its organizational structure. Everybody should be able to talk to anybody.

“Lovely and surprising . . . This delightful book is about finance, creative genius, workplace harmony, and luck.”—Fortune “Enchanting,”—New York Times “I love this book! I think it is brilliant.”—Ed Catmull, cofounder and president of Pixar Animation, president of Disney Animation, and coauthor of the bestseller Creativity Inc. The revelatory saga of Pixar’s rocky start and improbable success After Steve Jobs was dismissed from Apple in the early 1990s, he turned his attention to a little-known graphics company he owned called Pixar. One day, out of the blue, Jobs called Lawrence Levy, a Harvard-trained lawyer and executive to whom he had never spoken before. He hoped to persuade Levy to help him pull Pixar back from the brink of failure. This is the extraordinary story of what happened next: how Jobs and Levy concocted and pulled off a highly improbable plan that transformed Pixar into one of Hollywood’s greatest success stories. Levy offers a masterful, firsthand account of how Pixar rose from humble beginnings, what it was like to work so closely with Jobs, and how Pixar’s story offers profound lessons that can apply to many aspects of our lives. “Part business book and part thriller—a tale that’s every bit as compelling as the ones Pixar tells in its blockbuster movies. It’s also incredibly inspirational, a story about a team that took big risks and reaped the rewards . . . I loved this book and could not put it down.”—Dan Lyons, best-selling author of Disrupted “A natural storyteller, Levy offers an inside look at the business and a fresh, sympathetic view of Jobs.”—Success Magazine An Amazon Best Book of 2016 in Business & Leadership • A top pick on Fortune’s Favorite Booksof 2016 • A 2017 Axiom Business Book Award winner in Memoir/Biography
