Homepage - Business in the Community

About us. Business in the Community is the oldest and largest business-led membership organisation dedicated to responsible business.. What we do. We inspire, engage and challenge members and we mobilise that collective strength as a force for good in society to. Create a skilled, inclusive workforce today and for the future

About us - Business in the Community

introduction This is the story of the family of John and Sarah O ` Brien of Bandon, Co. Cork, Ireland. Sarah O ` Brien was born in Desertserges near Ballineen, west of Bandon, on 20th May 1875.

One in six children in the developed world is diagnosed as having 'developmental or behavioural problems' - this book explains why and shows what can be done about it. Children throughout the developed world are suffering: instances of obesity, dyslexia, ADHD, bad behaviour and so on are all on the rise. And it's not simply that our willingness to diagnose has increased; there are very real and growing problems. Sue Palmer, a former head teacher and literacy expert, has researched a whole range of problem areas, from poor diet, lack of exercise and sleep deprivation to a range of modern difficulties that are having a major effect: television, computer games, mobile phones. This combination of factors, added to the increasingly busy and stressed life of parents, means that we are developing a toxic new generation. TOXIC CHILDHOOD illustrates the latest research from around the world and provides answers for worried parents as to how they can protect their families from the problems of the modern world and help ensure that their children emerge as healthy, intelligent and pleasant adults.

Learn how routers network using the OSPF (Open Shortest Path First) protocol and unpick Dijkstra ` s Network Algorithm to see how OSPF performs the calculations to determine the shortest or most appropriate path between two routers. OSPF: A Network Routing Protocol dives deep into the OSPF protocol without sacrificing simplicity in language. All of this is done with running examples and illustrations to clarify concepts and enhance the enjoyment of networking. OSPF: A Network Routing Protocol is an absorbing, comprehensible account of OSPF, including the algorithm which is used for calculating its routes. While OSPF has traditionally been an organizational networking protocol, in these exciting times of Software Defined Networking (SDN), it has assumed an important role in the consolidated data center too. Now that the traditional distinctions between server and network roles are getting blurred, everyone in the data center needs to become familiar with networking and networking protocols!

The saga of love, loyalty, and crime continues in the next explosive book in the Cartel series from the minds of New York Times bestselling authors Ashley & JaQuavis. After the tragic and bloody end to The Cartel ` s reign, Carter is forced into isolation to evade the law. Wwith his wife, Miamor, facing federal charges and his dear brother, six feet under, Carter has never been more alone. His empire is at his feet and he has no idea how to rebuild his kingdom. The only thing that is certain is that he has to stay out the way and off the radar of the Feds until he can figure out how to get his lady out of prison. Miamor ` s freedom is guaranteed—provided Carter help create and distribute a drug that will take the streets by storm. Rubbing elbows with the most notorious, ruthless leaders of the underworld will get him what he wants. But can he win at their game of murder and money?

Everything is connected... We're living in the midst of a scientific revolution that's captured the general public's attention and imagination. The aim of this new revolution is to develop a "theory of everything"- -- a set of laws of physics that will explain all that can be explained, ranging from the tiniest subatomic particle to the universe as a whole. Here, readers will learn the ideas behind the theories, and their effects upon our world, our civilization, and ourselves.

A practical cookbook on building portals with GateIn including user security, gadgets, and every type of portlet possible.

Europe is at war and does not know it. She is overrun by invaders from the Global South, who seek to replace those who have inhabited her lands for at least the last 30,000 years. She is subject to an American overlord, whose world system dictates her de-Europeanization and globalization. She is mismanaged and betrayed by EU technocrats, corrupt politicians, and plutocratic elites. Without a revolutionary mobilization in her defense, the thousand-year-old civilization that grew out of the medieval Respublica Christiana and that we today associate with 'Europe' - along with the unique genetic heritage of her peoples - will forever cease to exist. Guillaume Faye - doctorate from one of France's most prestigious Ecoles, social philosopher, author of numerous books and articles - is the Cassandra warning Europeans of their approaching extinction, and the need to prepare for the impending Battle of Europe. Michael O`Meara, Ph.D., studied social theory at the Ecoles des Hautes Etudes en Sciences Sociales, and modern European history at the University of California. He is the author of New Culture, New Right: Anti-Liberalism in Postmodern Europe (2004)."

DK Eyewitness Great Scientists is an exciting and informative guide to the fascinating lives of the world's most famous thinkers, philosophers, inventors, innovators and pioneers. Stunning photographs offer a unique "eyewitness" view of the ideas and innovations that have changed the way we live today. Your child will discover all about Benjamin Franklin's electrical charges, Albert Einstein's theory of relativity and the many others whose discoveries have shaped our world. Great for projects or just for fun, make sure your child learns everything they need to know about Great Scientists. Find out more and download amazing clipart images at www.dk.com/clipart.

This refreshing approach to the act of dreaming allows you to explore your full potential through the control of your dreams. It aches the reader how to construct dreams that will improve reality, and demonstrates how such dreams directly affect our lives.

Tour the Magnolia State and crack the case in this series of mystery novellas, all set in towns across Mississippi. Author Phil Hardwick captures the essence of each community while engaging the reader in a good mystery. It's an intriguing life for recurring character Jack Boulder, a middle-aged private eye who visits local landmarks in search of clues that will solve the mystery.

A clear-eyed look at the instrumental role drugs have played in our cultural, social, and spiritual development. • First American publication of the surprising European bestseller. • Examines everything from the ancient use of ergot and datura to the modern phenomenon of "designer" drugs such as Ecstasy and crack cocaine. From remotest antiquity to the present era of designer drugs and interdiction, drugs have played a prominent role in the cultural, spiritual, and social development of civilizations. Antonio Escohotado demonstrates how the history of drugs illuminates the history of humanity as he explores the long relationship between mankind and mind-altering substances. Hemp, for example, has been used in India since time immemorial to stimulate mental agility and sexual prowess. Aristotle's disciple Theophrastus testifies to the use of datura by the ancient Greeks and further evidence links the rites at Eleusis to the ingestion of a hallucinogen. Similar examples can be found in cultures as diverse as the Celts, the ancient Egyptians, the Aztecs, and other indigenous peoples around the world. Professor Escohotado also looks at the present-day differences that exist between the more drug-tolerant societies like Holland and Switzerland and countries advocating complete repression of these substances. The author provides a comprehensive analysis of the enormous social costs of the drug war that is coming under increasing fire from all levels of society. Professor Escohotado's work demonstrates that drugs have always existed and been used by societies throughout the world and the contribution they have made to humanity's development has been enormous. The choice we face today is to teach people how to use them correctly or to continue to indiscriminately demonize them. "Just say no," the author says, is not an option. Just say "know" is. Antonio Escohotado is a professor of philosophy and social science methodology at the National University of Distance Education in Madrid, Spain. He travels widely, offering lectures and seminars on the subject of drugs and history.
