In alchemy, earth was believed to be primarily dry, and

secondarily cold, (as per Aristotle). Beyond those classical attributes, the chemical substance salt, was associated with earth and its alchemical symbol was a downward-pointing triangle, bisected by a horizontal line.

This is a book about sacred symbols from all over the world. All told by beings protected by the Great Mother, she who once was the very Heart and Soul of every godchild. And still is! Tumbling through the tale, the Little people, will share their gifts with the readers. Here you will find the mystical quintessence, the treasures, the alchemical gems, long

sought in many legends, lores and mysteries created on Earth. The great plunge into the wet is a great lesson for Heart to redefine her positions, while she highlights the pollution of Mother Earth. The Great Mother is Mother Nature, the archetypal woman in God and the long lost Goddess. Her story, with the wee folks illustrious wits and zealous labours, is personally and magnificently told Time Lords, shape shifters and animals will speak; a Sun master will rise above the horizon. A Star temple will emerge from the very land of the Grail, the land of Merlin, and also, of a mystical David Jones! Readers will be given insight into the craft of rolling the rocks, or true Masonry, as it has never been done before. The question may arise, did one half of soul miss out on something vitally important while stuck head-long on working the physical gold?

My dissertation examines the Franciscan engagement with medicinal alchemy between 1250 and 1360. I investigate the works of three generations of Franciscan alchemical and apocalyptic authors: Roger Bacon (ca. 1214/20-ca. 1292), Vitalis of Furno (1260-1327), and John of Rupescissa (ca. 1300-ca. 1366). Working across the disciplines of religious studies and the history of science, I demonstrate that the material process of alchemy inflected Christian conceptions of apocalypse, resurrection, and prophecy. Radical apocalypticism and religious alchemy share a defining characteristic. Both are concerned with manifesting spiritual truth on the physical plane. In the case of the Apocalypse, evil is neither an idea nor a concept, rather it is personified by Antichrist and his followers. The New Jerusalem was not merely a vehicle for spiritual reflection; it was a promise to the elect. Therefore, those who will be resurrected in body and inhabit the New Jerusalem will manifest heaven writ on earth. Alchemy represented an even more present possibility of

literally distilling a heavenly reality. The alchemist's theoretical ability to create a post-resurrection body or to use the substance of heaven to cure every ailment, drive away demons, and bestow courage on enemies of Antichrist not only effaced the separation of heaven and earth, it offered unmediated access to divine power.

Never before has the esoteric significance of the "Novel of the Century" been explained. At last its profound symbolism is made clear in light of the Hermetic tradition, establishing The Lord of the Rings to be the work of an illuminated imagination. Alchemy in Middle-earth traces J.R.R. Tolkien's motifs to unexpected connections with Scotland, the Middle East, and legendary Atlantis, and unveils the ancient wisdom in Tolkien's great work not only with the Alchemy of the past, but also with the living mystical alchemy of Sufism. In the process, the mysterious relationship between the spirituality of Islam and Tolkien's Christianity is revealed, signifying nothing less than the completion of the Grail quest at the end of an age.

Strengthen the qualities in your Taoist astrological chart with Inner Alchemy techniques and Universal Healing Tao exercises

- Describes how to interpret your Taoist astrology birth chart and discover the unique combination of Five Elements underlying your personality, health, and destiny
- Reveals how to strengthen your birth chi with Inner Alchemy techniques and Universal Healing Tao exercises
- Explains how to calculate your wealth phase, organ health, and luck cycles

Each of us is born with a unique combination of heavenly and earthly energies dictated by the stars overhead and the season on Earth at the moment you take your first breath. Known in Taoist astrology as the Four Pillars of Destiny, this "birth chi" can be calculated using the year,

month, day, and time of your birth. Master Mantak Chia and astrologer Christine Harkness-Giles reveal how to interpret your birth chi and strengthen weaknesses within your astrological energies. They explain how each of us is ruled by one of the Five Elements--Wood, Fire, Earth, Metal, and Water--in a Yin or Yang state. For each Element and Yin or Yang combination, the authors describe personality traits, ideal career paths, and emotional and health issues. They reveal how to discover your levels of success, wealth, and power; how your astrological strengths will manifest; and how to understand your relationships with partners, friends, and family. They also explain how to use your chart to calculate your organ health and annual luck cycles. The authors show how to use Inner Alchemy techniques, such as color therapy and feng shui, and Universal Healing Tao exercises, such as the Healing Sounds and Chi Kung, to harmonize and strengthen the inborn imbalances and weaknesses in your chart. This hands-on method of astrology allows you to take control of your health and destiny by connecting your personal energy with the energies of the cosmos.

▫ Examines how integrating important alchemical images with Gaian science can offer insights into our interconnectedness with Gaia
▫ Looks at how the four components of the living earth--biosphere, atmosphere, hydrosphere, and lithosphere--mesh with the four elements of alchemical theory and the four functions of consciousness as understood by depth psychology
▫ Offers guided meditations and contemplative exercises to open your receptivity to messages from the biosphere and help you connect more deeply with Gaia
During the scientific revolution, science and soul were drastically separated, propelling humanity into four centuries of scientific exploration based solely on empiricism and rationality. But, as scientist and ecologist Stephan Harding,

Ph.D., demonstrates in detail, by reintegrating science with profound personal experiences of psyche and soul, we can reclaim our lost sacred wholeness and help heal ourselves and our planet. Harding begins with compelling introductions to depth psychology, alchemy, and Gaia theory--the science of seeing the Earth as an intelligent, self-regulating system, a theory pioneered by his mentor James Lovelock. He then explores how alchemy, as understood through the depth psychology of C. G. Jung, offers us powerful methods of reuniting rationality and intuition, science and soul. He examines the integration of important alchemical engravings, including *L'Azoth des Philosophes* and the *Rosarium Philosophorum*, with Gaian science. He shows how the seven key alchemical operations in the Azoth image can help us develop deeply transformative experiences and insights into our interconnectedness with Gaia. He then looks at how the four components of the living Earth--biosphere, atmosphere, hydrosphere, and lithosphere--mesh not only with the four elements of alchemical theory but also with the four functions of consciousness from depth psychology. Woven throughout with the author's own experiences of Gaia alchemy, the book also offers guided meditations, shamanic practices, and contemplative exercises to open your receptivity to messages from the biosphere and help you develop your own Gaia alchemical way of life, full of wonder and healing.

more than 375 different minerals, crystals, and gemstones. The Alchemy of Stones presents an inspired breakthrough in Robert Simmons's thirty-five year career of exploring and revealing the spiritual qualities and potentials of minerals, crystals, and gemstones. This holistic, Earth-based framework for understanding stones and their energies initiates readers into an alchemical worldview that leads to spiritual healing, transformation, and transcendence. Engaging readers step by step, Simmons provides guidance on discovering and harnessing the three human powers of intention, attention, and imagination, each a crucial component for meeting and working in harmony with the energies of the Stone Beings. Simmons also introduces us to the Divine Feminine intelligence known as Sophia, or Wisdom. The Stone Beings are her emissaries, and through relating and co-creating with them, the healing and redemption of ourselves and the Earth becomes a reality. Offering an illustrated dictionary of the spiritual qualities of more than 375 different minerals, crystals, and gemstones, Simmons also explores in depth what he calls the Four Cornerstones of the Alchemy of Stones: Moldavite, Phenacite, Azeztulite, and Rosophia. He discusses the stages of alchemical transformation and provides meditative practices with specific stones to go with each stage. He also explores how to work with stone mandalas, crystal body layouts, gemstone elixirs, and Orgonite energy devices and details powerful techniques for working with stones. Woven throughout are Simmons's personal stories of the pivotal mystical experiences that triggered his capacity to feel stone energies and led him to develop his relationship with the stones, revealing how this work can open minds and awaken hearts. Lavishly illustrated, The Alchemy of Stones is an invitation to a journey of enlightenment, transformation, and spiritual metamorphosis aligned with the path of our living,

In 1952 a country clergyman called Smith begins his tortuous quest for the Holy Grail of alchemy - the Philosophers' Stone which transmutes base metal to gold and confers immortality. As he pits himself against the bizarre perils of the Great Work, it becomes clear that his arcane transformations are as much spiritual as chemical. Gradually the shadow of alchemy falls over those around him; a young girl whose sudden pregnancy is a local scandal; Janet, trapped in a barren marriage; and Robert who pursues his own quest for the legendary blue glass of Chartres. Thirty years later, Eileen comes to live in Smith's vicarage. In the medieval cellar she unearths a hidden manuscript and begins to read of secret fire and mysterious prime matter, a green lion and a raven's head, a fatal conjunction of king and queen, a descent into Blackness and putrefaction. As she penetrates farther into the alchemical labyrinth, she is haunted both by her own history and by that of her neighbours, the menacing Mrs Zetterberg and the disfigured Pluto - and, finally, by the enigma of Smith himself. In separate but interwoven accounts, Smith and Eileen strive towards the one thing necessary for the Work's success - the great Secret guarded by the paradoxical Mercurius, who leads them to the zero point where Heaven is wedded to Earth and the miraculous Stone appears at the intersection of time and eternity. By reconstructing a highly sophisticated but almost forgotten world-view, Mercurius restores to us our own spiritual heritage which, rooted in the alchemists' dark retorts, will perhaps flower in the light of the future.
