In 1996, the Federal Facilities Council (FFC), which operates under the aegis of the National Research Council, established a standing committee on Environmental Engineering with the express purpose of providing a forum where federal environmental engineers and program managers could meet on a regular basis to exchange information about facilities-related environmental programs, policies, and issues. The committee members, like environmental program managers in other types of organizations, are increasingly concerned about achieving and demonstrating sound environmental performance by meeting the requirements of environmental regulations and limiting the impacts of their products or services on the environment. To foster communication and address concerns about EMSs, the FFC Standing Committee on Environmental Engineering hosted a one-day workshop on Environmental Management Systems and ISO 14001. The workshop was held April 9, 1998, at the National Academy of Sciences in Washington, D.C.

This book evaluates the evolution of regulatory policy in advanced countries and discusses how, due to globalization, policy changes in one country have a knock-on effect in others. Separated in two parts, the first half focuses on policy in developed countries and regulatory diffusion from Europe to Asia. The second part looks at the business impact of policy developments in a number of Southeast Asian countries. Key chapters discuss Thailand's response to EU chemical regulations, the diffusion of private food standards, and the effect of chemical safety standards in Malaysia and Vietnam. These contributions are written by leading scholars in the field and the book is likely to be of interest to students, researchers and policy makers concerned with regulation changes in East Asia.
