This book offers a skills-oriented approach to learning English to study and for professional purposes. The subject content is arranged on such thematic world view lines and are certain to be of special interest to engineers, technologists and scientists.

English for Engineers & Technologists is in two volumes and has been written by teachers. It has been produced by the Department of Humanities and Social Sciences, Anna University and is a British Council-aided project. The writing of the book was supervised by three specialists from the Ealing College of Higher Education, London. The contents of the books are based on eight real-life topics which are interesting and relevant to engineering/technical students. Each unit is in turn divided into three sub-topics (eg. the Resources unit has water , gold and human resources). The exercises in each of the lesson units are aimed at developing in the students, skills in listening, discussion, reading, writing and presentation.

English for Engineers & Technologists is in two volumes and has been written by teachers. It has been produced by the Department of Humanities and Social Sciences, Anna University and is a British Council-aided project. The writing of the book was supervised by three specialists from the Ealing College of Higher Education, London. The contents of the books are based on eight real-life topics which are interesting and relevant to engineering/technical students. Each unit is in turn divided into three sub-topics (eg. the Resources unit has water , gold and human resources). The exercises in each of the lesson units are aimed at developing in the students, skills in listening, discussion, reading, writing and presentation.

The new combined edition looks at the relevance of content and clear communication. Current information from the fields concerned has been incorporated and a learner-centred approach is used. Themes of world relevance have been used to divide the chapters into sections. Subjects such as natural and human resources and their exploitation, energy and mass communication, developments in the fields of computers and technology such as BPOs, artificial intelligence, rainwater harvesting, solar and wind energy, nuclear power, e-learning, Internet culture, etc. have been used in this new edition. Wherever necessary, fresh exercises have been added; so also elements such as email, phrasal verbs, modals etc. have been worked into the units. Altogether the book is fresh and new because of these changes and has a new large format with generously laid out photographs and pictures.

The scope of Business Skills for Engineers and Technologists is wider than many traditional business texts, including hot topics such as e-commerce, business ethics and law, as well as fully up-to-date coverage of management issues and finance. The interactive style of the book is ideally suited for the study of business and management topics. Rather than focussing solely on management theory, the subjects are explored within real-world engineering contexts through numerous case studies and activities, which bring the content to life and create a highly accessible text for the student reader. The IIE Textbook Series from Butterworth-Heinemann Student-focused textbooks with numerous examples, activities, problems and knowledge-check questions Designed for a wide range of undergraduate courses Real-world engineering examples at the heart of each book Core texts suitable for students with no previous background studying engineering "I am very proud to be able to introduce this series as the fruition of a joint publishing venture between Butterworth-Heinemann and the Institution of Incorporated Engineers. Mechanical Engineering Systems is one of the first three titles in a series of core texts designed to cover the essential modules of a broad cross-section of undergraduate programmes in engineering and technology. These books are designed with today's students firmly in mind, and real-world engineering contexts to the fore - students who are increasingly opting for the growing number of courses that provide the foundation for Incorporated Engineer registration." -Peter F. Wason BSc(Eng) CEng FIEE FIE FIMechE FIMgt. Secretary and Chief Executive,IIE This essential text is part of the IIE accredited textbook series from Newnes - textbooks to form the strong practical, business and academic foundations for the professional development of tomorrow's incorporated engineers. Content matched to requirements of IIE and other BSc Engineering and Technology courses An essential textbook, providing all the information for student engineers preparing to work in a business environment, including hot topics such as e-commerce and business ethics Student-centred text featuring worked examples, case studies, assignments and knowledge-check questions throughout
