Environmental Economics is the first text to concentrate solely on environmental economics--the problems of earth, air, and water pollution from an economic perspective--with an emphasis on both government regulation and private-sector anti-pollution incentives. With the assumption that readers already have an understanding of intermediate microeconomics, the book reaches into more detail on ...

Environmental Economics / Edition 2 by Charles D. Kolstad...

Charles D. Kolstad is Professor of Economics and Professor of Environmental Science & Management at the University of California, Santa Barbara. He is also affiliated with Resources for the Future and the National Bureau of Economic Research. Table of Contents.

Intermediate Environmental Economics has established itself as one of the field's most authoritative texts, as well as one of the more challenging. It distinguishes itself from other books by presupposing that readers already have an understanding of intermediate microeconomics. Thus, this book concentrates only on environmental economics-problems of pollution of earth, air, and water-with an emphasis on regulation and private-sector anti-pollution incentives, and coverage of international examples.

A unique approach to sensorless control and regulator design of electric drives Based on the author's vast industry experience and collaborative works with other industries, Control of Electric Machine Drive Systems is packed with tested, implemented, and verified ideas that engineers can apply to everyday problems in the field. Originally published in Korean as a textbook, this highly practical updated version features the latest information on the control of electric machines and apparatus, as well as a new chapter on sensorless control of AC machines, a topic not covered in any other publication. The book begins by explaining the features of the electric drive system and trends of development in related technologies, as well as the basic structure and operation principles of the electric machine. It also addresses steady state characteristics and control of the machines and the transformation of physical variables of AC machines using reference frame theory in order to provide a proper foundation for the material. The heart of the book reviews several control algorithms of electric machines and power converters, explaining active damping and how to regulate current, speed, and position in a feedback manner. Seung-Ki Sul introduces tricks to enhance the control performance of the electric machines, and the algorithm to detect the phase angle of an AC source and to control DC link voltages of power converters. Topics also covered are: Vector control Control algorithms for position/speed sensorless drive of AC machines Methods for identifying the parameters of electric machines and power converters The matrix algebra to model a three-phase AC machine in d-q-n axes Every chapter features exercise problems drawn from actual industry experience. The book also includes more than 300 figures and offers access to an FTP site, which provides MATLAB programs for selected problems. The book's practicality and realworld relatability make it an invaluable resource for professionals and engineers involved in the research and development of electric machine drive business, industrial drive designers, and senior undergraduate and graduate students. To obtain instructor materials please send an email to pressbooks@ieee.org To visit this book's FTP site to download MATLAB codes, please click on this link: ftp://ftp.wiley.com/public/sci_tech_med/electric_machine/ MATLAB codes are also downloadable from Wiley Booksupport Site at http://booksupport.wiley.com

This book offers a comprehensive introduction to the subject of control engineering. Both continuous- and discrete-time control systems are treated, although the emphasis is on continuous-time systems. A chapter each is devoted to in-depth analysis of non-linear control systems, control system components, and optimal control theory. The book also introduces students to the modern concepts of neural fuzzy and adaptive learning systems.

This volume includes a selection of papers presented at the EURESCO Conference " The International Dimension of Environmental Policy " held in Kerkrade, The Netherlands, in October 2000. We would like to thank those who made this conference possible: the European Science Foundation (ESF), which provided financial and organizational support; the European Commission EURESCO Programme; the Netherlands Organization for Scientific Research (NWO), which sponsored the conference under the research project: " Environmental Policy, International Competitiveness and the Location Behavior of Firms " ; and GLOBUS, Tilburg University. The European Science Foundation (ESF), the EURESCO Programme, NWO and GLOBUS cannot be held responsible for the contents and/or opinions expressed in this volume. Our gratitude also goes to the people who assisted us in editing this volume: the papers ' referees, the authors, our publisher Kluwer, and Ineke Lavrijssen and Evelyn Rogge for invaluable editorial help at different stages of this project. Laura Marsiliani W. Allen Wallis Institute of Political Economy, University of Rochester, USA and Department of Economics and Finance, University of Durham, United Kingdom; Michael Rauscher Institute of Economics, Rostock University, Germany; Cees Withagen Department of Economics and Center, Tilburg University, The Netherlands and Department of Economics, Vrije Universiteit Amsterdam, The Netherlands. [Marsiliani, L., Rauscher, M. and Withagen, C.] (eds), [Environmental Economics and the International Economy], vii.

Media expansion into the digital realm and the continuing segregation of users into niches has led to a proliferation of cultural products targeted to and consumed by women. Though often dismissed as frivolous or excessively emotional, feminized culture in reality offers compelling insights into the American experience of the early twenty-first century. Elana Levine brings together writings from feminist critics that chart the current terrain of feminized pop cultural production. Analyzing everything from Fifty Shades of Grey to Pinterest to pregnancy apps, contributors examine the economic, technological, representational, and experiential dimensions of products and phenomena that speak to, and about, the feminine. As these essays show, the imperative of productivity currently permeating feminized pop culture has created a generation of texts that speak as much to women's roles as public and private workers as to an impulse for fantasy or escape. Incisive and compelling, Cupcakes, Pinterest, and Ladyporn sheds new light on contemporary women's engagement with an array of media forms in the context of postfeminist culture and neoliberalism.

A comprehensive introduction to the emerging field of ecological economics assuming no prior knowledge of economics.

Most conventional cryogenic refrigerators and liquefiers operate with pure fluids, the major exception being natural gas liquefiers that use mixed refrigerant processes. The fundamental aspects of mixed refrigerant processes, though very innovative, have not received the due attention in open literature in view of commercial interests. Hundreds of patents exist on different aspects of mixed refrigerant processes. However, it is difficult to piece together the existing information to choose an appropriate process and an optimum composition or a given application. The aim of the book is to teach (a) the need for refrigerant mixtures, (b) the type of mixtures that can be used for different refrigeration and liquefaction applications, (c) the different processes that can be used and (d) the methods to be adopted for choosing the components of a mixture and their concentration for different applications.

A creative journal designed by psychotherapist, Sue Patton Thoele, this book combines inspiration, courage and constancy with an interactive growth experience. The author mixes quotes from her books with lessons and exercises to guide the private words and thoughts of readers.

Published in association with the BACUP, this textbook provides the required knowledge for counselling skills qualifications. The book relates to the activity of counselling skills and addresses the context and roles in which these skills are used. Each chapter of the book contains information and practical activities which are designed to test knowledge. The book offers comprehensive coverage of the following areas: ? Ethics and processes, including the description of the difference between counselling skills and counselling. ? Life stages. ? Theoretical perspectives. ? Values, attitudes and beliefs. ? Listening skills. ? Settings. ? Bullying and harassment. ? Mentoring. The book is ideal for students on counseling skills courses and those using counseling skills in a variety of different environments.
