"This book is about the creative and messy process of making environmental management decisions. The approach we describe is called Structured Decision Making, a distinctly pragmatic label given to ways for helping individuals and groups think through tough multidimensional choices characterized by uncertain science, diverse stakeholders, and difficult tradeoffs. This is the everyday reality of environmental management, yet many important decisions currently are made on an ad hoc basis that lacks a solid value-based foundation, ignores key information, and results in selection of an inferior alternative. Making progress--in a way that is rigorous, inclusive, defensible, and transparent--requires combining analytical methods drawn from the decision sciences and applied ecology with deliberative insights from cognitive psychology, facilitation, and negotiation. We review key methods and discuss case-study examples based in our experiences in communities, boardrooms, and stakeholder meetings. Our goal is to lay out a compelling guide that will change how you think about making environmental decisions"--

Strategic Environmental Management is the first book of its kind that actually shows you how to make TQEM work in your company. It provides the information, tools, and expert guidance you need to plan, implement, and successfully manage a TQEM program. You will also learn the benefits of fully integrating environmental management into your organization's overall business plan, and how to sell these benefits to top management. Dr. Grace Wever first lays the necessary conceptual groundwork with an in-depth discussion of EHS management as seen from the Baldrige, Deming, and ISO 14001 frameworks. She then arms you with a full complement of proven-in-the-trenches TQEM tools and techniques.
