Darwin's Finches: Darwin noted that all the finches on the Galapagos island looked about the same except for the shape of their beak. His observations lead to the conclusion that all the finches were descendants of the same original population. The shape of the beaks were adaptations for eating a particular type of food (Ex. long beaks were used for eating insects, short for seeds)

The audiobooks are read by volunteers from all over the world and are free to listen on your mobile device, iPods, computers and can be even burnt ...

Today many school students are shielded from one of the most important concepts in modern science: evolution. In engaging and conversational style, Teaching About Evolution and the Nature of Science provides a well-structured framework for understanding and teaching evolution. Written for teachers, parents, and community officials as well as scientists and educators, this book describes how evolution reveals both the great diversity and similarity among the Earth's organisms; it explores how scientists approach the question of evolution; and it illustrates the nature of science as a way of knowing about the natural world. In addition, the book provides answers to frequently asked questions to help readers understand many of the issues and misconceptions about evolution. The book includes sample activities for teaching about evolution and the nature of science. For example, the book includes activities that investigate fossil footprints and population growth that teachers of science can use to introduce principles of evolution. Background information, materials, and step-by-step presentations are provided for each activity. In addition, this volume: Presents the evidence for evolution, including how evolution can be observed today. Explains the nature of science through a variety of examples. Describes how science differs from other human endeavors and why evolution is one of the best avenues for helping students understand this distinction. Answers frequently asked questions about evolution. Teaching About Evolution and the Nature of Science builds on the 1996 National Science Education Standards released by the National Research Council--and offers detailed guidance on how to evaluate and choose instructional materials that support the standards. Comprehensive and practical, this book brings one of today's educational challenges into focus in a balanced and reasoned discussion. It will be of special interest to teachers of science, school administrators, and interested members of the community.

A Study Guide for Gjertrud Schnackenberg's "Darwin in 1881," excerpted from Gale's acclaimed Poetry for Students. This concise study guide includes plot summary; character analysis; author biography; study questions; historical context; suggestions for further reading; and much more. For any literature project, trust Poetry for Students for all of your research needs.

This Geology & Biblical History Curriculum Guide contains materials for use with Your Guide to the Grand Canyon, Your Guide to Zion and Bryce Canyon National Parks, Your Guide to Yellowstone and Grand Teton National Park, Explore the Grand Canyon DVD, Explore Yosemite and Zion National Parks DVD, and Explore Yellowstone DVD. Lesson Planner Weekly Lesson Schedule Student Worksheets Quizzes & Test Answer Key 8th - 9th grade 1 Year Science 1 Credit Features: Each suggested weekly schedule has three easy-to-manage lessons which combine reading, worksheets, and vocabulary-building opportunities including an expanded glossary for each book. Designed to allow your student to be independent, materials in this resource are divided by section so you can remove quizzes, tests, and answer keys before beginning the coursework. As always, you are encouraged to adjust the schedule and materials as you need to in order to best work within your educational program. Workflow: Students will read the pages in their book and then complete each section of the study guide worksheets. Tests are given at regular intervals with space to record each grade. Younger students may be given the option of taking open book tests. Lesson Scheduling: Space is given for assignment dates. There is flexibility in scheduling. For example, the parent may opt for a M-W schedule rather than a M, W, F schedule. Each week listed has five days but due to vacations the school work week may not be M-F. Please adapt the days to your school schedule. As the student completes each assignment, he/she should put an "X" in the box.

This edited book aims to provide a global perspective on socioscientific issues (SSI), responsible citizenship and the relevance of science, with an emphasis on science teacher education. The volume, with more than twenty-five contributors from Africa, North and South America, Asia, Australasia and Europe, focuses on examples from in- and pre-service teacher training. The contributors expand on issues related to teachers' beliefs about teaching SSI, teachers' challenges when designing and implementing SSI-related activities, the role of professional development, both in pre- and in-service teacher training, in promoting SSI, the role of the nature of science when teaching SSI, promoting scientific practices through SSI in pre-service teaching, and the role of indigenous knowledge in SSI teaching. Finally, the book discusses new perspectives for addressing SSI in teacher education through the lens of relevance and responsible citizenship.

A non-technical analysis of the controversial culture war over Darwin versus intelligent design states that there is no irrefutable evidence supporting Darwinism, argues that Darwin-based theories that are taught in school are not fact-based, and reveals how scientists at major universities believe in intelligent design. Original.
