PEARSON SCIENCE covers the three strands of Science Inquiry Skills, Science as a Human Endeavour and Science Understanding with both interactive multimedia and books to engage students and teachers.

Exploring Science and Mathematics in a Child's World provides a cohesive discussion of how to make learning science and mathematics both valuable and enjoyable for young children. Part I chapters are foundational and help students understand child development, interrelated mathematics and science processes, and Concept Exploration design. Part II activity chapters uniquely help students gain a solid understanding of scientific topics, while they learn how to implement activities with children using constructivist and inquiry-based

methods.

This book presents the reader with some of the earliest classic SF short stories – all of them published between 1858 and 1934, featuring both well-known and long-forgotten writers – dealing for the first time with topics to which science had (some) answers only at much later stages. This includes aspects of alien life forms, transmogrification, pandemics, life on Mars, android robots, big data, matter transmission and impact events to name but a few. The short stories are reprinted in full alongside extensive commentaries which also examine some of the latest scientific thinking surrounding the story 's main theme and provide the reader with suggestions for further reading.

The Pearson Science activity book for Year 9 is a write-in resource designed to develop and consolidate students' knowledge and understanding of science by providing a variety of activities and questions to reinforce learning outcomes. It caters for a variety of learning styles and will reinforce, extend and enrich learning initiated through the student book.

Pearson Mathematics student book for Year 8 follows the Australian Curriculum for Mathematics. It has been strategically designed to attract maximum student engagement, develop a deep understanding of key concepts and skills, and to encourage inquiry and problem solving. This student book provides you with extensive material, with a collection of

maths games, investigations, problem solving tasks, revision activities, practice questions and technology explorations. Additionally, a mini, re-usable whiteboard has been provided, in the back of Pearson Mathematics student book for Year 8, to help encourage active participation from your students. All exercises within the student books are split into the Australian Curriculum proficiency strands: fluency, understanding and reasoning. You ' ll also find open-ended questions that encourage creative maths thinking. Accuracy has been observed by this series, with experienced teachers carefully checking every question within Pearson Mathematics - up to five times!

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with
