The guidance intends to support public procurement practitioners (also called public buyers or procurement officers) in dealing with EU-funded contracts for the procurement of works, supplies and services as set out in Directive 2014/24/EU of the European Parliament and of the Council of 26 February 2014 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts (see Table 1. below).

Public procurement guidance for practitioners

The Guidelines offers information related to the Tendering Procedures, its implementation in practice, issues and cases faced during daily work, as well as solutions or opportunities to find such solutions. The Guidelines describes the tendering and contractual environment and covers the most common forms

These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

Large international construction projects often have a range of major contractors, subcontractors and consultants based in different parts of the world and working to different legal theories and understandings. This can lead to confusion in the understanding, interpretation and execution of the construction contract, which can result in significant disruption to the construction project. International Construction Contract Law is written for anyone who needs to understand the legal and managerial aspects of large international construction projects, including consulting engineers, lawyers, clients, developers, contractors and construction managers worldwide. In 18 chapters it provides a thorough overview of civil law /common law interrelationships, delivery methods, standard forms of contract, risk allocation, variations, claims and dispute resolution, all in the context of international construction projects. Highly practical in approach – it introduces legal analysis only when absolutely essential to understanding, the book also contains a range of useful appendices, including a 10-language basic dictionary of terms used in FIDIC forms.

The FIDIC Conditions of Contract for Construction and the Conditions of Contract for Plant and Design-Build (known as the 1999 Red Book and the 1999 Yellow Book) were first published in 1999 and have been used for a large number of contracts around the world. During 2005, FIDIC and the multilateral development banks cooperated to publish the MDB Harmonised Conditions of Contract for Construction. This book

is a revised and extended edition of the authors earlier guides.

This publication serves to inform those carrying out a project that is financed in whole or in part by a loan from the Asian Development Bank (ADB), ADB-financed grant, or ADB-administered funds, of the policies that govern the procurement of goods, works and services required for the project.

Construction Law in the United Arab Emirates and the Gulf is an authoritative guide to construction law in the United Arab Emirates and the Gulf. The principal theme is the contrast between construction law in an Islamic civil law jurisdiction and construction law in a common law jurisdiction. • the first authoritative text on the application of the laws of the UAE • extensive extracts from the region's applicable laws, all translated from Arabic, and hundreds of judgments of the most senior courts used to back up the analysis provided

This is a step-by-step manual of public procurement for government officials, researchers, and students.

Bribery by international firms in OECD countries is more pervasive in public procurement than in the utilities, taxation or judicial sectors. Whilst most international efforts to fight corruption have focused exclusively on the bidding process, recent corruption scandals have highlighted grey areas throughout the whole public procurement cycle, including in needs assessment and contract management. This publication draws on the experience of procurement practitioners as well as audit, competition and anti-corruption specialists, and sets out a comparative overview of practices designed to enhance integrity throughout the whole procurement cycle, with examples from OECD and non-OECD countries.
