On the 10's and 11's is very hard to get apart. Your best bet is to detach the lower control arm from the subframe (3 bolts), remove the caliper from the knuckle, pull your front half shafts from the front bearing, then pull the whole strut/steering knuckle/ control arm assembly from the car as one piece. One tip, be sure to bungee cord the outer cv joint to the body to keep the joint from pulling apart when you are working on it.
