Aliens changed the world. Portals changed reality. Shadows will destroy us all. The year is 2042, and in the wake of alien contact and rapid expansion, Humanity and her allies find the multi-verse is not a welcoming place. Portals have opened around the colonies and throughout critical systems. Gateways to realities where shapeshifting Elves, monstrous Elementals, and impossible magic hold sway. As the Joint Fleet battles the unbelievable, rapid advancements in technology are pressed, blending the lines between machine and men. On the front lines of the conflict a techno-phobic snub-fighter pilot tries to forget his loss, a captured surgeon struggles to save the unending wounded, and an exiled psionic commando infiltrates the fleet. Their paths lead to the planet Hecate, where they discover that something darker than magic or technology is growing, feeding off the chaos. Forging an alliance seems impossible, but if they should fail it will not mean the loss of a colony or system, it will mean annihilation. The real war has begun among the shadows, and every reality will feel the impact in WarVerse.
