A brave, counterintuitive proposal for freeing our children from the shackles of the curiosity-killing institution we call school, Free to Learn suggests that it's time to stop asking what's wrong with our children, and start asking what's wrong with the system.

A developmental psychologist argues that children who are freed to follow their own interests through self-directed play will become better learners and achievers than the way they learn in modern school, which he says shows them that learning is work and not fun. 15,000 first printing.

"Peter Gray...forces us all to rethink our convictions on how schools should be designed to accommodate the ways that children learn." --Steven Pinker In Free to Learn, developmental psychologist Peter Gray argues that in order to foster children who will thrive in today's constantly changing world, we must entrust them to steer their own learning and development. Drawing on evidence from anthropology, psychology, and history, he demonstrates that free play is the primary means by which children learn to control their lives, solve problems, get along with peers, and become emotionally resilient. A brave, counterintuitive proposal for freeing our children from the shackles of the curiosity-killing institution we call school, Free to Learn suggests that it's time to stop asking what's wrong with our children, and start asking what's wrong with the system. It shows how we can act--both as parents and as members of society--to improve children's lives and to promote their happiness and learning.

With more kids at home now . . . here is a book for parents, family members and friends who want to maximise this time for a deeper learning experience for their children and themselves. Free Range Learning will encourage and excite those who want their children to reap important benefits from this period of "sheltering in place," learning at home. This is a book for anyone simply wanting some fresh ideas at this time, or those who wonder if a commitment to ongoing homeschooling might actually result in longer term benefits! The material in this book is backed by scientific and educational studies, along with the testimonies of scores of parents and kids from around the world. The work here is applicable for young people from pre-school through high school. Studies indicate that adults who were homeschooled are: * More likely to vote, volunteer and be involved in their communities than graduates of conventional schools. * Read more books than average. * More likely to have taken college level courses than the population as a whole. * Tend to be independent and self-reliant. Children are naturally "free range" learners. They build knowledge and skills naturally, within the full spectrum of their daily lives, while observing, exploring and pursuing their interests. This book guides any parent or educator in assisting that process.

Unleash powerful teaching and the science of learning in your classroom Powerful Teaching: Unleash the Science of Learning empowers educators to harness rigorous research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute--without additional prepping, grading, or funding! Research demonstrates that these powerful strategies raise student achievement by a letter grade or more; boost learning for diverse students, grade levels, and subject areas; and enhance students' higher order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With Powerful Teaching, you will: Develop a deep understanding of powerful teaching strategies based on the science of Learning Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings Think critically about your current teaching practices from a research-based perspective Develop tools to share the science of learning with students and parents, ensuring success inside and outside the classroom Powerful Teaching: Unleash the Science of Learning is an indispensable resource for educators who want to take their instruction to the next level. Equipped with scientific knowledge and evidence-based tools, turn your teaching into powerful teaching and unleash student learning in your classroom.

Why is it that we trust Jesus with our salvation but never fully trust him with our lives? God longs to unleash his full measure of power in our lives to fill us with passion and purpose. But too often the things of our past--fear, anger, bitterness, worry and doubt--hold us back. Rather than focusing on the reality of who Christ is and what he has done for us, we allow ourselves to be identified by all the things we aren't. But we are not who our past says we are, and we are not who the enemy says we are. We are who God and his Word say that we are. Pastor Perry Noble challenges all followers of Christ to make a bold move by fully embracing the exciting adventure God has called us to. Are you ready to unleash all the life he has created you to live? Join Perry on this journey as he digs into the major barriers holding people back and shows how Jesus calls and equips his followers to experience a life most of us never dreamed possible.

If you're eager to share the wonders of life in the real world with your children, to help them explore a world larger and more exciting than school's four walls and rigid programs can offer, let me share my unschooling experience with you. Thinking about homeschooling? Curious about unschooling? Walk with me as I share the five paradigm-changing ideas about learning and living that freed my family from the school schedule. With over ten years of experience, I have come to see how key these ideas were, and still are, to our unschooling lives. With stories, examples, and clear language, Free to Learn explores the depth and potential of unschooling. Learning freely, living joyfully.

The Power of Empowering Others Leadership isn't easy. It takes grit, courage, and vision, among other things, that can be hard to come by on your toughest days. When leaders and aspiring leaders seek out advice, they're often told to try harder. Dig deeper. Look in the mirror and own your natural-born strengths and fix any real or perceived career-limiting deficiencies. Frances Frei and Anne Morriss offer a different worldview. They argue that this popular leadership advice glosses over the most important thing you do as a leader: build others up. Leadership isn't about you. It's about how effective you are at empowering other people--and making sure this impact endures even in your absence. As Frei and Morriss show through inspiring stories from ancient Rome to present-day Silicon Valley, the origins of great leadership are found, paradoxically, not in worrying about your own status and advancement, but in the unrelenting focus on other people's potential. Unleashed provides radical advice for the practice of leadership today. Showing how the boldest, most effective leaders use a special combination of trust, love, and belonging to create an environment in which other people can excel, Frei and Morriss offer practical, battle-tested tools-based on their work with companies such as Uber, Riot Games, WeWork, and others--along with interviews and stories from their own personal experience, to make these ideas come alive. This book is your indispensable guide for unleashing greatness in other people . . . and, ultimately, in yourself. To learn more, please visit theleadersguide.com.

Allow your children to experience the adventure, freedom, and wonder of childhood with this practical guide that provides all the information, inspiration, and advice you need for creating a modern, quality homeschool education. Inspired by the spirit of Henry David Thoreau--"All good things are wild and free"--mother of five Kinley Arment founded Wild + Free. This growing online community of mothers and families want their children to receive a quality education at home by challenging their intellectual abilities and nurturing their sense of curiosity, joy and awe--the essence of a positive childhood. The homeschool approach of past generations is gone--including the stigma of socially awkward kids, conservative clothes, and a classroom setting replicated in the home. The Wild + Free movement is focused on a love of nature, reading great books, pursuing interests and hobbies, making the entire world a classroom, and prolonging the wonder of childhood, an appealing philosophy that is unpacked in the pages of this book The Call of the Wild and Free offers advice, information, and positive encouragement for parents considering homeschooling, those currently in the trenches looking for inspiration, as well as parents, educators, and caregivers who want supplementary resources to enhance their kids' traditional educations.
