As our knowledge of the human body becomes ever more exact, scientists have made remarkable leaps forward in many fields. Yet for one question that many of us would like answered--What causes the body to burn fat?--we find all sorts of confusing claims. Since we know so much about how our body works, can't science tell us the answer? As it turns out, science already has.I have spent over ten years reading thousands of fat-loss studies. Not theories promoted by diet gurus. Only the proven data.My investigation uncovered all kinds of scientific findings: - Studies stating how certain foods cripple our ability to burn fat - Scientists showing how to burn fat while eating more food - Researchers revealing how to get all the benefits of traditional exercise in a tenth of the time - Physiologists finding out how eating less sets us up to gain fat in the long run - Doctors discussing how a few minutes of a new form of exercise immunizes us against fat gain - Endocrinologists explaining how we fix the underlying condition causing us to gain fat We deserve to know the proven facts about fat loss, but who has time to read tens of thousands of pages of scientific studies? The study took me more than a decade. It should not take you that long because the facts have been summarized in this book. They have also been simplified, so anyone who wants to lose weight can understand them. Make no mistake. Tons of clinical studies have shown the best way to trim off those unwanted pounds.It is time to stop listening to marketing myths about how to lose weight. We tried it. It failed. Finally...a fun, easy-to-use guide to potty training any child in just ONE DAY Just think, from the time babies are born until they are toilet trained, they use an average of 4,000 diapers! Potty Train Your Child in Just One Day is the helpful guide you've been waiting for to get

your child out of diapers and turn the potentially terrifying process of toilet training into an effective and enjoyable bonding experience with your child. Teri guides parents to the successful one-day potty training of their child by teaching them how to:

- Look for the signs that your child is ready to be potty trained
- Make the potty connection by using a potty-training doll
- Create incentive through consistent positive reinforcement
- Use charts, quizzes, and checklists to help with every step of potty training
- Know when it's time to bring in a potty pinch hitter
- Complete your potty training -- no more accidents

Once Teri teaches you her techniques, she shares her secret -- potty parties! She has carefully designed twelve imaginative themes for parties, such as a seriously silly circus, a cartoon character carnival, or a magic carpet express, and supplies parents with everything they will need. Teri has proven that a potty party day engages a child in potty training in a way that no other method has before -- by speaking a toddler's language. A party may translate to fun, games, cake, candy, presents, and prizes to a child, but with Teri's expertise, parents can use it as a tool to motivate their child to want to go to the bathroom -- and to keep on going. That's why it works in just one day!
