and, because this exam

is still relatively new,

there aren't that many

past papers out there.

The papers in this book

have been created to try

experience for you.

Some people might

suggest using your

literature texts for

practice, but the whole

point of this exam is that

it is unseen: it's best to work on extracts you've never read before.

There is more than one way to tackle an exam paper. You could sit it in one go and complete it in exam conditions from start to finish. You could go at the papers gently, with modelled examples in front of you to help (check out the videos at [youtube.com/mrbruff](https://www.youtube.com/mrbruff)).

Another method is to try three question threes all in a row, slide tackling your way through the paper. You might want to complete all of the Section B questions before beginning Section A. However you do it, take your time, and use the indicative content at the end to check your work. The indicative content isn't

Marking your own work

although these are good
