This complete self-study course on coding combines content, practice, and self-assessment into one online learning tool that the learner can follow at his or her own pace. The online program assumes the role of instructor, guiding individuals through the material and directing them when to read relevant sections from the text, checking their comprehension along the way, and providing feedback and encouragement. Users follow the program and learn at their own pace, working through chapter "lesson lectures" and reading assigned sections of the text as they progress. Interactive exercises, questions, and activities allow users to

check their comprehension and learn from immediate feedback. Illustrations clarify concepts and familiarize students with the clinical procedures they are learning to code. Chapter exams are scored and incorporated in a grade book, which users can view to evaluate their progress. A series of approximately 18 SlideShows with audio narration explain and demonstrate clinical procedures. Hypertext links incorporated into the lesson lectures open pop-up boxes with further explanations and/or definitions of concepts and terms. Links to relevant web sites provide additional resources to enhance learning or stimulate discussion within a cohort group. An extensive glossary of approximately 650 terms provides correct definition for key terms throughout the course. All content has been updated to current industry standards; for use with Step-by-Step Medical Coding, 5th Edition

ensuring that students learn from the most up-to-date material available. Each online chapter includes engaging "lesson lectures" by the author, guiding the learner through the online and text content.

Interspersed self-comprehension questions, learning activities, and lesson quizzes throughout the online content allow learners to check their comprehension and learn from feedback. End-of-chapter review and self-assessment exercises include a specially created case-based coding activity, as well as matching, fill-in-the-blank, and multiple choice.

Answers to the textbook exercises allow students to check their work on the exercises printed in the text against the answers posted within the course.

Penetration testers simulate cyber attacks to find security weaknesses in networks, operating systems, and applications. Information security experts worldwide use penetration techniques to evaluate enterprise defenses. In *Penetration Testing*, security expert, researcher, and trainer Georgia Weidman introduces you to the core skills and techniques that every pentester needs. Using a virtual machine-based lab that includes Kali Linux and vulnerable operating systems, you'll run through a series of practical lessons with tools like Wireshark, Nmap, and Burp Suite. As you follow along with the labs and launch attacks, you'll experience the key stages of an actual

assessment—including information gathering, finding exploitable vulnerabilities, gaining access to systems, post exploitation, and more. Learn how to:

- * Crack passwords and wireless network keys with brute-forcing and wordlists *
- Test web applications for vulnerabilities *
- Use the Metasploit Framework to launch exploits and write your own Metasploit modules *
- Automate social-engineering attacks *
- Bypass antivirus software *
- Turn access to one machine into total control of the enterprise in the post exploitation phase

You'll even explore writing your own exploits. Then it's on to mobile hacking—Weidman's particular area of research—with her tool, the Smartphone Pentest Framework. With its collection of hands-on lessons that cover key tools and strategies, Penetration Testing is the introduction that every aspiring hacker needs.
