Whether you've never picked up a knife or you're an accomplished chef, there are only four basic factors that determine how good your food will taste. Salt, Fat, Acid, and Heat are the four cardinal directions of cooking, and they will guide you as you choose which ingredients to use and how to cook them, and they will tell you why last minute adjustments will ensure that food tastes exactly as it should. This book will change the way you think about cooking and eating, and help you find your bearings in any kitchen, with any ingredients, while cooking any meal. --

In this science-based book, registered dietitian Abby Langer tackles head-on the negative effects of diet culture and offers advice to help you enjoy food and lose weight without guilt or shame. There are so many diets out there, but what if you want to eat well and lose weight without dieting, counting, or restricting? What if you want to love your body, not punish it? Registered dietitian Abby Langer is here to help. In her first-ever book, Abby takes on our obsession with being thin and the diets that are sucking the life, sometimes literally, out of us. For the past twenty years, she has worked with clients from all walks of life to free them from restrictive diets and help them heal their relationship with food. Because all food is good for us—yes, even carbs and fats. All diets are bad. Diets are like Band-Aids for what's really bothering us: Although we might lose weight, they prey on our insecurities, rob us of time and money, and often leave us with the same negative views of food and our bodies that we've always had. When the weight comes back, we still haven't solved the real issues behind our eating habits—our “why.” This book is different. Chapter by chapter, Abby helps readers uncover the “why” behind their desire to lose weight and their relationship with food, and make lasting, meaningful change to the way they see food, nutrition, themselves, and the world around them. In this book, you'll learn how guilt and shame affect your food choices, how fullness and satisfaction aren't the same feeling, why it's important to quiet your “diet voice” and enjoy food, and what the best way to eat is according to science. Empowering, inclusive, smart, and a must-have, Good Food, Bad Diet will give you the tools to reject diets, repair your relationship with food, and lose weight so you can move on with your life.
