Wayne Cattanach begins by explaining the qualities that distinguish bamboo from all other materials: It has a tensile strength akin to steel, yet it is very light. He describes the process that will take anyone from lengths of hard, raw bamboo to a beautiful finished rod with clear, step-by-step instructions and illustrations, including how to find the best supplies; select tools and materials; make heat treaters and binders; cut culms; straighten bamboo strips; plane and stagger strips; bind strips; apply finishes; mount the reel seat, ferrules, and tip-top; and much more.
