Centra-GP8 Ventilated Centrifuge Cat. No. 3121 -- For 100/120/220/240 VAC, 50/60 Hz Centra-GP8R ... even alerts operators when periodic maintenance is due. ... IEC ships the centrifuge in a carton that protects it from shipping hazards.

In the reauthorization of the Clean Water Act in 1987, the U.S. EPA specifically addressed toxics management. In addition to the requirement to eliminate discharge of toxics, there can be a requirement to conduct a toxicity reduction evaluation (TRE). The scope of toxicity reduction varies from the very simple and inexpensive to the highly complex and costly. This book, volume three of the Water Quality Management Library, provides a complete overview of toxicity reduction evaluation. The book presents the testing and removal of toxicants, toxicity testing procedures, sampling techniques, baseline collection data, and source identification. Plus, the book presents toxicity reduction methodologies including unit processes necessary for organic toxicant control using biological and physical chemical methodologies as well as selected unit processes necessary for inorganic toxicant control.

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

This book presents detailed methods on a variety of aspects of Salmonella research, focusing on those which provide landmarks for future discovery. It is the first comprehensive volume of methods and protocols for studying Salmonella and will be indispensable to researchers engaged in the study of Salmonella, and enterobacteria in general. Each chapter provides a short overview of the topic, followed by detailed explanations of techniques.

Santa Fe Police Chief Kevin Kerney is back in the tenth and most entertaining novel in Michael McGarrity's acclaimed mystery series. After years away on the pro rodeo circuit, Johnny Jordan struts into Santa Fe to ask his boyhood friend, Santa Fe Police Chief Kevin Kerney, to serve as a technical advisor on a contemporary Western movie to be filmed along the Mexican border. Kerney agrees and plans a working vacation on location, in a remote area of the state known as the Bootheel, with his wife, Lt. Colonel Sara Brannon, and their three-year-old son, Patrick. But, a dead man on the road near an isolated border crossing, a federal undercover investigation into immigrant smuggling, the search for a fugitive from military justice hiding somewhere in Europe, and Johnny Jordan's troublesome behavior all ensure that nothing goes as planned. As separate investigations embroil them in circumstances that will forever change their lives, Kerney must care for Patrick while Sara plays a dangerous game of Pentagon politics. Packed with family secrets, international intrigue, and memorable characters, this is McGarrity's most ambitious and involving novel to date-- traveling an accelerating arc from Santa Fe to the desert grasslands and mountains of the Bootheel, to the most secret levels of the Pentagon, to a resort town on the coast of Ireland, and back to an adrenaline-charged climax on a desolate landing strip a few miles north of the Mexican border.

Due in part to the selective nature of telomerase inhibition as an anticancer approach, the field has expanded considerably in the past decade. The recent advances in methods of telomerase inhibition encompass many different areas of research including molecular biology, cell biology, biochemistry, oncology and gerontology. Telomerase Inhibition provides methods and protocols for those researchers. The techniques described in this book should provide the researcher with a diverse and comprehensive set of tools with which to study telomerase inhibition. Leaders in the field provide recently developed methods that have widespread application such as targeting the telomerase holoenzyme, its RNA template and other elements associated with telomerase activity. Additional methods involving the screening of telomerase inhibitors and telomerase inhibition combined with other chemotherapeutic agents are presented. This text, on the cutting edge of the field, will provide investigators with the most recent methods applied to the expanding field of telomerase inhibition.

"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.

In Masters Not Friends, Mubbashir Rizvi lends a historical and ethnographic perspective to the rise of one of the largest, most successful land rights movements in South Asia, the Anjuman Mazarin Punjab (AMP), who, against all odds, successfully resisted the Pakistani military and made a case for their moral right to farmland. The case of AMP provides a unique lens through which to examine state and society relations in Pakistan, and bridge literatures from subaltern studies, military power, colonial technology and governance, and the language of claim-making. More broadly, Rizvi offers a glimpse of Pakistan that contrasts with its standard framing as a hub of radical militancy and terrorism.
