This introductory textbook is for students who are interested in learning about and establishing healthy marriage, family, and intimate relationships. With divorce rates high and relationships fragile, books and courses are needed that help students address important issues regarding relationships. The readers of this text examine many important and relevant issues through the lens of theory and research and do so using a written format that is readable, understandable, and easy to apply to one's life. It was written so that each chapter has information that readers will find helpful as they attempt to establish and maintain meaningful, healthy relationships. There are questions throughout each chapter that help readers focus not only on the material but also on how the material relates to their present and past relationship and family situations. The text provides material on the research of John Gottman, the object relations theory of Harville Hendrix, the solution-focused approach of Michele Weiner-Davis, and the PREP approach to conflict management of Markman, Stanley, and Blumberg. These and other topics discussed are very relevant to students' concerns and are addressed in greater depth than found in most other texts. The emphasis is not just on couple relationships but also on family relationships. Therefore, in this book there is extensive coverage of family systems theory and the influence of family rules and family structure on the development of families. There is also material on how change produces transitions in family life that must be assimilated into the family structure—for example, when a couple has their first child. Thus, both couple and family issues are addressed throughout the book. For instructors who want to focus their courses on marriage, family, and intimate relationships, this book would be an ideal choice. A study guide for students and instructional material for instructors can be obtained by visiting www.understandingrelationships.net.

This best-selling text on marriages, families, and relationships combines a rigorous scholarly and applied approach with a theme especially relevant to today's dynamic global environment: making choices in a diverse society. The authors use an engaging narrative to create a highly readable text that offers insightful perspectives on the diversity of our modern society, including different ethnic traditions and family forms. The balanced presentation discusses a variety of theoretical perspectives (e.g., family ecology, structure-functional, interaction-constructionist, family systems, biosocial), emphasizing both social structure and the importance of individual agency, choice, and decision-making. Students are encouraged to question assumptions and reconcile conflicting ideas and values as they make informed choices in their own lives. Couples and families worldwide have a constant electronic connection to others, a fact that is influencing the concerns and issues they bring to therapy. The authors of this resource help mental health practitioners to better deal with concerns such as online infidelity, online dating, internet addictions, cyber bullying, and many more by introducing the Couple and Family Technology (CFT) framework, a multi-theoretical approach that doesn't require clinicians to change their preferred clinical approach. The CFT framework acknowledges the ways in which couples navigate their relationship with technology and a partner simultaneously, and it attends to, and in some cases incorporates the role of technology in therapeutic ways. Included in the authors' discussion of how different technologies affect relationships is • a survey of what individuals' motivations of usage are • an examination of the specific issues that emerge in treatment • a study of the risks particularly relevant to intimate relationships, and • an introduction of the first-ever technology-based genogram. They also examine technological usage across different developmental points in a couple's lifespan, with attention given throughout to people from various cultural backgrounds. Along with the CFT framework, the authors also introduce a new discipline of family research: Couple and Family Technology. This discipline integrates three broad perspectives in family science and helps therapists maintain a systemic focus in assessing and treating couples where issues of the Internet and new media are problematic. Online resources can be accessed by purchasers of the book and include videos, additional case studies, glossary, and forms.
