HIGHLIGHTS 2020

History. The Standard Book Number (SBN) is a commercial system using nine-digit code numbers to identify books. It was created by Gordon Foster, Emeritus Professor of Statistics at Trinity College, Dublin, for the booksellers and stationers WHSmith and others in 1965. The ISBN identification format was conceived in 1967 in the United Kingdom by David Whitaker (regarded as the "Father of the ...

geautomatiseerde, gespecialiseerde documentatiebestanden over bosbouw en houtproducenten, voorzien van inlichtingen over het soort literatuur dat gedocumenteerd is en de wijze waarop de literatuur toegankelijk is gemaakt

If you dream of being published, this book will teach you the nuts and bolts of what it means to be an author. In a friendly, informative and practical way, Georgia Richter and Deborah Hunn share all you need to know about inspiration and research, preparing to submit to a publisher, creating an author brand, legal, ethical and moral considerations, pitching, effective social media and much more. Practical advice and top tips from Liz Byrski, Alan Carter, Nandi Chinna, Tim Coronel, Amanda Curtin, Daniel de Lorne, Deb Fitzpatrick, James Foley, Alecia Hancock, Stephen Kinnane,

'Baverstock is to book marketing what Gray is to anatomy; the undisputed champion.' Richard Charkin, Executive Director of Bloomsbury Publishing and President Elect of the International Publishers Association Over four editions, Alison Baverstock 's How to Market Books has established itself as the industry standard text on marketing for the publishing industry, and the go-to reference guide for professionals and students alike. With the publishing world changing like never before, and the marketing and selling of content venturing into uncharted technological territory, this

Customer much needed new edition seeks to highlight the role of the marketer in this rapidly changing landscape. The new edition is thoroughly updated and offers a radical reworking and reorganisation of the previous edition, suffusing the book with references to online/digital marketing. The book maintains the accessible and supportive style of previous editions but also now offers: a number of new case studies detailed coverage of individual market segments checklists and summaries of key points several new chapters a foreword by Michael J Baker, Professor Emeritus of Marketing, Strathclyde University.

Conventional applications of neural networks usually predict a single value as a function of given inputs. In forecasting, for example, a standard objective is to predict the future value of some entity of interest

Online Library Isbn Title Author Format Rrp 1 7 16

on the basis of a time series of past measurements or observations. Typical training schemes aim to minimise the sum of squared deviations between predicted and actual values (the 'targets'), by which, ideally, the network learns the conditional mean of the target given the input. If the underlying conditional distribution is Gaussian or at least unimodal, this may be a satisfactory approach. However, for a multimodal distribution, the conditional mean does not capture the relevant features of the system, and the prediction performance will, in general, be very poor. This calls for a more powerful and sophisticated model, which can learn the whole conditional probability distribution. Chapter 1 demonstrates that even for a deterministic system and 'benign' Gaussian observational noise, the conditional distribution of a future observation, conditional on a set of past

Author Format Rrp 1 7 16

Observations can become strongly skewed and multimodal. In Chapter 2, a general neural network structure for modelling conditional probability densities is derived, and it is shown that a universal approximator for this extended task requires at least two hidden layers. A training scheme is developed from a maximum likelihood approach in Chapter 3, and the performance of this method is demonstrated on three stochastic time series in chapters 4 and 5.

This book constitutes the refereed proceedings of the joint 9th Asia-Pacific Web Conference, APWeb 2007, and the 8th International Conference on Web-Age Information Management, WAIM 2007, held in Huang Shan, China, June 2007. Coverage includes data mining and knowledge discovery, P2P systems, sensor networks, spatial and temporal databases,

Web mining, XML and semi-structured data, privacy and security, as well as data mining and data streams.

"The first truly comprehensive, honest, objective guide to publishing I've seen" - Polly Courtney
Confused and bamboozled by the wide world of self-publishing? Written a book but have no idea how to get it onto shelves? Disillusioned by traditional publishing and want something better? Well, you're in the right place. Shelf Help is the brand new and comprehensive guide to becoming a professional indie author. This handy little pocket guide will tell you in great detail exactly how to go from manuscript to royalty cheque. With Shelf Help, you'll learn how to self-publish the DIY way - retaining all your rights, royalties, and utter creative control whilst keeping it cheap, quick, and above all, professional.

So whether it's cover design that's foxed you, or eBooks that give you a headache, self-publishing consultant Ben Galley has the answers. Also featuring interviews with best-selling authors and self-publishing gurus: Hugh Howey, Joanna Penn, and Polly Courtney.

A study of the archaeology and history of ancient harbours, with particular focus on the Greek world during the Archaic and Classical eras. It questions what locations were the most propitious for the installation of harbours; what kinds of harbour-works were built and for what purpose; and what harbour forms were documented.
