A comprehensive guide to mitigating risk and fostering growth in the Islamic financial sector Islamic finance, like conventional finance is a business offinancial intermediation. Its distinctive features relate to the requirement that it abides by Shari'a rules that promote fairness of contracts and prevention of exploitation, sharing of risks and rewards, prohibition of interests, and tangible economic purpose. Islamic finance should not fund activities considered "haram" or sinful. In Islamic Finance and Economic Development: Risk, Regulation, and Corporate Governance, authors Amr Mohamed El Tiby and Wafik M. Grais expound how these distinctive features bear on the opportunities and challenges facing the Islamic finance industry's development, risk management, regulation and corporate governance. An experienced banker with various Middle East banking institutions, notably as former Vice President at UAE Union National Bank and Mashreq bank, Dr. El Tiby offers an informed perspective on corporate finance from within the Islamic finance industry. With a long experience in international development and finance, notably as former Director at the World Bank and Founder and Chairman of a Cairo-based Financial Advisors company, Dr. Grais brings global financial experience on the topics of financial systems assessments, corporate governance, Islamic finance, and public policy. Covers the history and basics of Islamic finance, and provides insight into current conditions and future landscape Explores regulatory framework, including opportunities and challenges for the industry's development and mainstreaming Presents an approach to developing a systemic Shari'ah governance framework to govern operations in the Islamic finance industry

Although Islamic finance is one of the fastest growing segments of emerging global financial markets, its concepts are not fully exploited especially in the areas of economic development, inclusion, access to finance, and public policy. This volume is to improve understanding of the perspective of Islamic finance on economic development, social and economic justice, human welfare, and economic growth.

Although Islamic finance is one of the fastest growing segments of emerging global financial markets, its concepts are not fully exploited especially in the areas of economic development, inclusion, access to finance, and public policy. This volume is to improve understanding of the perspective of Islamic finance on economic development, social and economic justice, human welfare, and economic growth.

Over the last thirty years, Islamic banking has emerged as a viable and efficient model of financial intermediation. In conventional economic systems, the interest rate mechanism is at the heart of that process, however the Islamic financial system cannot rely on that mechanism. With this fact considered, this volume explores the role of Islamic finance in promoting growth and development. It highlights the benefits that Islamic banking can bring to society as an alternative model of financial intermediation and presents interesting case studies that examine certain features of Islamic finance and their relationship with growth, economic and financial stability, allocative efficiency and social justice.

The book is a collection of chapters discussing the Sustainable Development Goals in the broader context of Islamic finance along with mapping the SDGs with Maqasid Al-Shariah. It provides a framework for both Muslim and non-Muslim countries to develop a sustainable economy which encompasses not only the concept of the welfare state but also supports development-related activities, ensures financial inclusion through equal distribution of wealth and alleviation of poverty, and protects the overall environmental and ecological system. More specifically, this book explores various aspects of Islamic finance in relation to parameters of SDGs; restructuring of Islamic finance and connecting its dots in the light of SDGs; Islamic perspective on ESG and ecological quality; interest-free tools and modernization of Islamic financial institutions for sustainable development and economic stability; and the role of Islamic finance in infrastructure-related development activities. Consistent with the view that SDGs are embedded within the theme of Islamic finance, this book is specifically designed to meet the needs of key regulatory institutions, academic scholars, and industry practitioners both in the field of Islamic finance and sustainable finance. M. Kabir Hassan is a Professor of Finance in the Department of Economics and Finance at the University of New Orleans, USA, where he currently holds two endowed Chairs Hibernia Professor of Economics and Finance and Bank One Professor in Business. He was the University of Louisiana Systems outstanding faculty member for 2019. Dr. Hassan is the winner of the 2016 Islamic Development Bank (IsDB) Prize in Islamic Banking and Finance. New Issues in Islamic Finance & Economics: Progress and Challenges provides a review of the main issues and challenges facing Islamic finance. The application of Islamic finance is currently limited to banking. This book starts with an overview of the factors and motives behind the development of Islamic finance. A critical review of issues facing the industry is provided followed by a detailed analysis of areas where further attention is required. The book offers some original thinking on issues pertaining to governance, institutions, public finance and economic development within an Islamic financial system.

Most books on Islamic finance and development issues are written from an academic perspective. Although academic reflection is key for future direction, dissatisfaction with previous development efforts, as evidenced by their lack of sustainability, suggests the need for a different type of review. Development work is complex and requires a detailed and transparent approach in order to ensure a cogent resolution for potential long-term issues. Each intervention area requires specific elaboration for meaningful impact. The perfect solution for one sector might be detrimental for another. Islamic finance, with its strict Riba restrictions, rules, and other checks and balances, is a good fit for infrastructure development in pursuit of sustainable development. When it comes to sustainable development, this book argues, Islamic finance has the tools to intervene for maximum impact. However, the issue of sustainability is not only related to Islamic finance; more policy discourse is needed. This requires guidance from the principles of Islamic economics, as well. This book discusses infrastructure development vis-à-vis sustainable development, drawn from decades of real-life development banking experience, and proposes impactful intervention methods based on wisdom from Islamic economics and finance.

Developing economies such as those in sub-Saharan Africa are searching for realistic economic policy prescriptions. Despite economic growth in countries like Nigeria, poverty and unemployment blight the lives of many, in the midst of plenty. Simultaneously, much neo-classical economic thought is being questioned against the backdrop of global economic meltdown, giving rise to inquiry about more integral approaches to sustainable development. In An Integral Approach to Development Economics, Basheer Oshodi examines modernization theories, dependency theories, world system theories and emerging 21st century economic theories and links a neo-modern mix of economic thought with the practicalities of finance in parts of the World where poverty is rife. In a specifically African setting, over half of the population are Muslims, Oshodi considers Islamic finance in the context of the triple heritage of indigenous culture, Westernized Christianity, and Islam. He argues that the principles of Islamic banking and finance can be integrated with other elements of that heritage, focusing on meeting the challenges of poverty and unemployment. Islamic finance is not just a religiously-oriented, Sharia-compliant, alternative financial model. It can contribute to overall socio-economic transformation and a wider, people-centred approach to economic development. International organizations, financial institutions, reserve banks,

policy makers, donor agencies and students will find resonance in this valuable addition to Gower's Transformation and Innovation Series.
