“It’s Time to Align” by Allen Lottinger describes how everything in the natural world has vibrations. As conscious beings, we have the ability to “raise or lower our vibrations based on our choices.” When our vibrations are raised, wealth, love, peace, and purpose-things that we desire-become our reality.

Many books have been written regarding the law of attraction. The best known one, *The Secret*, is reported to have grossed \$300 million worldwide. But what if all these books are missing the most important information we can use when it comes to activating this law in our lives? Furthermore, what if this information is purposely being suppressed—and has been for thousands of years—by entities intent on keeping humans from growing spiritually? *It's Time to Align* takes a look at how the law of attraction really works and how it is being suppressed in our lives. It also explains how to overcome this manipulation and how to experience alignment with the creative power of the universe.

are Heaven and Hell? These are all questions that we've asked ourselves at one time or another. Traditional religions have satisfactorily answered what they could based on the timeframes that they were written. Today, technology is advancing to the point where many people are abandoning faith altogether. Scientists have concluded that the universe originated with a Big-Bang. Time and Space are nothing more than a curiosity described by mathematical equations. What if there was an alternative view? What if that alternative view combined what we know about science and what we know about God and sought to find an ultimate truth. What if that ultimate truth had more to do with the harmonics and resonance of music than the cold hard mathematics of current science. Do you think that you're ready? Perhaps life really does have meaning. We've come so far. Where do we

Every decision made impacts the future, and often in ways we cannot begin to comprehend. But what if you had the opportunity to alter the impact of an important decision without changing the decision itself? *Odyssey of the Id* explores such possibilities without losing sight of the ever-so-human and fallible nature of the people involved. The adventure begins with *Before Its Time*. In this first installment of *Odyssey*, a young man's well-meaning if misguided attempt to "save the world" brings together a disparate group of people, setting them on a quest they can barely believe is happening. Together they embark upon an adventure that will impact all of humanity; all the while, growing into that most special and unique bond that is family. Anthony McGuire is originally from

This volume of Lecture Notes in Computer Science contains the revised versions of the papers presented at the 9th International Conference on Implementation and Application of Automata, CIAA 2004. Also included are the extended abstracts of the posters accepted to the conference. The conference was held at Queen's University in Kingston, Ontario, Canada on July 22–24, 2004. As for its predecessors, the theme of CIAA 2004 was the implementation of automata and grammars of all types and their application in other fields. The topics of the papers presented at the conference range from

applications of automata in natural language and speech processing to protein sequencing and gene compression, and from state complexity and new algorithms for automata operations to applications of quantum finite automata. The 25 regular papers and 14 poster papers were selected from 62 submissions to the conference. Each submitted paper was evaluated by at least three Program Committee members, with the help of external referees. Based on the referee reports, the paper "Substitutions, Trajectories and Noisy Channels" by L. Kari, S. Konstantinidis and P. Sosik was chosen as the winner of the CIAA 2004 Best Paper Award. The award is sponsored by the University of California at Santa Barbara. The authors of the papers presented here come from the following countries and regions: Austria, Canada, Czech Republic, Finland, France, Germany, Hong Kong, Netherlands,

most dramatic prophecies, which were all based on observation of past events and calculations of future patterns. Don Cerow scientifically explains the astronomical facts of the vernal equinox and its changing relation to various stars and constellations. As time progresses, the celestial positions of the planets and stars crossing the celestial equator and the ecliptic, or path of the sun, change. These various alignments and intersections herald great changes in the development of our planet. We learn how various historical events reflected certain astronomical alignments in the past and how we may anticipate the effects of such events in the future. The book includes numerous tables and black-and-white illustrations.
