Journey Toward the Caring Classroom by Laurie S. Frank

Journey Toward the Caring Classroom, 2nd Edition, deftly bridges the gap between conventional and experiential education, empowering educators/facilitators to use their minds, intuition, and knowledge along with a growing body of evidence to create an environment that supports learning, community building, and social-emotional development. Educational theory, concrete in-class strategies, and engaging activities encourage educators to transform their classroom into a caring place where every ...

Journey Toward the Caring Classroom | mysite

Journey Toward the Caring Classroom describes a learning environment that begins with the idea of classroom as community, filled with students sharing common interests and joint participation. The necessity of beginning with an environment that values each member is emphasized, and creating a safe place where students can be free to learn from mistakes and disagree without being torn apart is a priority.

This experiential activity book was put together by teachers for teachers. The activities in this book focus on developing pro-social skills that will help both children and adults interact in positive and caring ways. The classroom setting contains everything needed to implement these pro-social activities. Activities focuses on improving skills like listening, following directions ...

This book makes a case for backing away from our narrow focus of fixing problems to encompass a broader view of what works in schools. It is a resource that summons us to step back, take a deep breath, and search for the common ground of supporting the next generation to be healthy and whole human beings. It offers a way to view one's classroom and school as a commons that is influenced by the school culture and climate; which, in turn, influence the creation of a sense of community. From this view, teaching and learning can take place in a context of sharing, support, and collaboration. Students can take necessary risks to learn because they allow themselves to be open to ideas and different ways of knowing. In the process they can learn and practice what it means to work with others, act with integrity, and take responsibility. This book deftly bridges the gap between conventional and experiential/adventure education by re-casting the classroom teacher as educator/facilitator/guide. It is user friendly and empowers teachers to cultivate flexibility within their educational practice and to use their mind, intuition, knowledge, and the growing body of research available to identify where their students actually are and give them what they need, not what standards say are appropriate. The theory, research, and discussion of social/emotional competencies is solid! This is what we need to make our case in public and conventional private schools. This book is timely and appropriate in that it meets schools' needs and desires for culture and climate change, addressing bullying, social justice, and social – emotional development while balancing those needs against the needs for research-based instruction and curriculum design and the requirements to meet state standards (in many cases).

Describes how to create an effective learning environment in which students share common interests and goals.

Empower your students instead of coercing them through punishments and external rewards. Engaged by the activities in this character education curriculum, students will choose responsible behavior. Help your students master communication skills, create plans, make decisions, solve problems, and resolve conflicts. Your efforts will build classroom communities that support character development, individual and social responsibility, and academic excellence.

The Caring Classroom describes a process of creating a place where all students feel safe enough to learn. It is a guide for teachers that is packed full of activities, tips and information that helps to facilitate the growth of your classroom as a community. Students learn what it means to be part of a community by being one.

Addressing social justice issues in a physical education context is necessary both at the higher education and PK-12 settings. Limited undergraduate and graduate programs educate their students about social justice issues, thus, resulting in licensed teachers who lack the content knowledge, comfort level and pedagogical tools on how to educate students about issues related to social justice. Grounded in the transformative pedagogy theoretical framework, this book will offer practical lessons and strategies on a wide variety of social issues (e.g., body, race, self-identity, immigration) that can be used in teacher education and the PK-12 setting. The goal is for teacher educators and practitioners to feel more comfortable with teaching about and for social justice and believe this resource will enhance their content and pedagogical knowledge in the quest to achieve that goal. The purpose of this book is to provide physical education teacher educators and PK-12 physical education teachers with lesson plans and resources on how to address social justice issues in a physical education setting. This book will include sample lesson plans/activities that address a wide variety of social issues the what, the how and the challenges and possibilities that the author(s) encountered when teaching such a lesson/activity. Addressing social justice issues has been limited in physical education, both in higher education and PK-12, especially in the United States. Numerous scholars, internationally, have engaged in research studies that explored how social justice issues are addressed in physical education teacher education. Although we have research to support the limitations and complexities of teaching about sociocultural issues and for social justice, a more practical resource for teacher educators and inservice teachers is needed. The market for this book will be physical education teacher educators and PK-12 physical education teachers throughout the world.

Social and Emotional Learning in Action(SELA) is an easy to use sourcebook facilitated by teaching and/or counseling practitioners primarily in school settings. The pedagogical basis for these lessons are shaped around the research findings of the Collaborative for Academic, Social, and Emotional Learning (CASEL), indicating that the inclusion of social and emotional development programs positively affect academic achievement.

Towards Inclusion of All Learners through Science Teacher Education serves as a resource for teachers and teacher educators wishing to understand how to educate students with exceptionalities in science by connecting their experiences to leading experts

The first teacher's guide to the proven counseling approach known as motivational interviewing (MI), this pragmatic book shows how to use everyday interactions with students as powerful opportunities for change. MI comprises skills and strategies that can make brief conversations about any kind of behavioral, academic, or peer-related challenge more effective. Extensive sample dialogues bring to life the "dos and don'ts" of talking to K-12 students (and their parents) in ways that promote self-directed problem solving and personal growth. The authors include the distinguished codeveloper of MI plus two former classroom teachers. User-friendly features include learning exercises and reflection questions; additional helpful resources are available at the companion website. Written for teachers, the book will be recommended and/or used in teacher workshops by school psychologists, counselors, and social workers. This book is in the Applications of Motivational Interviewing series, edited by Stephen Rollnick, William R. Miller, and Theresa B. Moyers.

The mission of this forty-eight chapter Handbook is to provide a comprehensive reference source that integrates counseling theory, research and practice into one volume. It is designed to meet the needs of entry-level practitioners from their initial placement in schools through their first three to five years of practice. It will also be of interest to experienced school counselors, counselor educators, school researchers, and counseling representatives within state and local governments.

Take the classroom outdoors—a place where children can explore, experiment, and initiate their own activities.
