Black Smoke. This is generally caused by an issue in the carburetor and fuel systems. The usual cause is a fuel-to-air mixture that is too rich, meaning it has more gasoline in the mix than it should. This in itself can have two probable causes – either your air filter is clogged, or your carburetor needs to be tuned.

Stop Smoking - What Colored Smoke Means and How to Fix It ...

Clogged Air Filter. The air filter is the first thing you'll want to check when looking to fix your surging mower. If it's dirty, it starves the mower engine of the oxygen required for combustion. Solution: Depending on the type of filter, you can clean or replace it. First, disconnect the spark plug wire.

Blue or white smoke coming from your engine usually indicates burning oil, which can be caused by: Overfilling the crankcase with oil. Incorrect oil grades. Operating engine at greater than a 15 degree angle. Inoperative crankcase breather. Crankcase air leak. Blown head gasket. Worn cylinder and/or rings

White/Blue Smoke From Lawn Mower Engine | Briggs & Stratton

One type of backfire that occurs in a 23 HP Kawasaki engine is caused by improper ignition timing. The combustion cylinder's fuel intake valve opens to take in a fuel/air mixture from the carburetor. The ignition timing is off, resulting in engagement of the spark plug before the intake valve closes, igniting all the fuel in the cylinder, as well as all the fuel in the manifold leading down from the carburetor.

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

In this Newbery Honor–winning novel, Gary D. Schmidt tells the witty and compelling story of a teenage boy who feels that fate has it in for him, during the school year 1968-69. Seventh grader Holling Hoodhood isn't happy. He is sure his new teacher, Mrs. Baker, hates his guts. Holling's domineering father is obsessed with his business image and disregards his family. Throughout the school year, Holling strives to get a handle on the Shakespeare plays Mrs. Baker assigns him to read on his own time, and to figure out the enigmatic Mrs. Baker. As the Vietnam War turns lives upside down, Holling comes to admire and respect both Shakespeare and Mrs. Baker, who have more to offer him than he imagined. And when his family is on the verge of coming apart, he also discovers his loyalty to his sister, and his ability to stand up to his father when it matters most.
