Maintenance and preparation for competition bikes, and tuning tips.

A celebration of the many motor trikes and three-wheeled motorcycles produced since the early days of motoring. Taking us right up to the present day, this book covers a wide range of machines from mild to wild, accompanied by original colour photographs. Featuring easy-to-read captions with minimum jargon: it will delight both enthusiasts and the novices alike.

An exciting fantasy novel for 8 to 12 year olds involving enchantment, mystery and a garden gnome. To the boy called Red, it seems the most marvellous escape he could wish for: a gift that grants him more freedom than he ever believed possible - the chance to fly, to soar with the gulls, high over the tall brick walls that have imprisoned him for so long. But this gift comes with a terrible price - and puts him in grave danger. Is there anyone Red can trust to help him? The curious Captain Bass who has strange powers of his own? The wildly unpredictable twin sisters he is strongly drawn to? In this magical, mysterious story, Red's adventure is like a chamber of mirrors at a carnival - a dazzling and breathtaking tale. 'This is a rich fantasy - alive with original twists, surprises and mysteries which I dare not reveal. Children's Literature is about to be enriched with a new classic.' Margaret Mahy

B&H Kids has designed 100 short devotionals to meet the needs of girls who have just made a decision to follow Christ. This devotional book has been theologically reviewed and was written specifically for girls. The devotionals are in a non-dated format, so girls can begin the devotional at any time throughout the year.

Male circumcision is one of the oldest and the most common procedures in the world; it is performed for both medical and non-medical reasons. Circumcision is a relatively simple procedure; however, if not done properly, can lead to major complications such as iatrogenic injury of the glans or the urethra. The debate over the advantages of the routine cultural circumcision is still ongoing with a significant dichotomy between the opinions of the experts in the field. The main purpose of this book is to present a discussion on the pros and cons of the non-medical male circumcision from a public health point of view, and to raise awareness about the potential complications of this procedure.
