Lettering for Architects and Designers by Martha ...  
Architects have both design and engineering experience, but it's difficult for them to track how your products will fit in with every single project they work on. And while you also cannot know the exact needs of every county in the nation, offering quick access to government websites that would know is an easy step that will set you apart from the competition and go a long way with building ...

Marketing to Architects: The Definitive Guide to Selling ...  
Russell Tovey's love letter to the Barbican "The Barbican is an intoxicating time capsule in design. I've always felt a great surge of appreciation and real comfort for brutalist architecture, since being young and going to the National Theatre on a school trip to see Sweeney Todd and eventually being lucky enough to have worked inside the building, the vast concrete solidity fascinates me.

Discover Russell Tovey's Love Letter to the Barbican ...  
On July 27, a group of global and elite British design firms, including Zaha Hadid Architects, Grimshaw, and Rogers, Stirk, Harbour + Partners, and nearly two dozen others, sent a public letter to Autodesk CEO Andrew Anagnost asking essentially for more attention in the development of Revit for architecture practices working at the leading edge of design, while simultaneously committing to ...

British Designers Send Letter to Autodesk|Demand Revit ...  
The design of Barbican can be seen as unrepeatable not because of the technical issue or the level of skill in architecture design but because of the special of the site. Wars, fires of the site bring barbican more meaning, also there is no more possibility of having such a big site in the centre of London city.

Style and History of the Barbican - UK Essays | UKEssays  
"What is proposed is like a monstrous carbuncle on the face of a much loved and elegant friend." So, 20 years ago today, the Prince of Wales famously opened his attack on modern British architecture.

The second edition of this bestselling text incorporates a new section showing students how to locate and choose lettering for different kinds of projects. Coverage includes lettering styles commonly used on a wide range of presentations.

Precise Architectural hand lettering for working drawings and presentations will be needed for the immediate future, despite the growing use of computer type styles in professional practice. Letter Sized LinedPaperBlack lines, dashes and dots on white paperSize: 8.5" x 11" (A4 size)

Typography has jumped off the printed page to stand on its own as branding, sculpture, and even architecture. Lettering Large examines this phenomenon through a diverse collection of images collected from a vast range of sources around the world. As technology has made construction and production of monumental letters possible, the demand for their design has grown exponentially. This book is the first to chronicle letters as presences in the urban landscape. Preeminent graphic design and typographic commentator and historian Steve Heller teams with Mirko Ilčić, a noted graphic designer, to select the most dramatic and telling examples culled from sites across the United States and throughout Europe and Asia.

The basics of the profession and practice of architecture, presented in illustrated A-Z form. The word "architect" is a noun, but Doug Patt uses it as a verb(claiming a term and making a point about using parts of speech and parts of buildings in new ways. Changing the function of a word, or a room, can produce surprise and meaning. In How to Architect, Patt(ian architect and the creator of a series of wildly popular online videos about architecture)presents the basics of architecture in A-Z form, starting with "A is for Asymmetry" (as seen in Chartres Cathedral and Frank Gehry), detouring through "N is for Narrative," and ending with "Z is for Zeal" (a quality that successful architects tend to have, even in fiction(see The Fountainhead's architect-hero Howard Roark.)) How to Architect is a book to guide you on the road to architecture. If you are just starting on that journey or thinking about becoming an architect, it is a place to begin. If you are already an architect and want to remind yourself of what drew you to the profession, it is a book of affirmation. And if you are just curious about what goes into the design and construction of buildings, this book tells you how architects think. Patt introduces each entry with a hand-drawn letter, and accompanies the text with illustrations that illuminate the concept discussed: a fallen Humpty Dumpty illustrates the perils of fragile egos; photographs of an X-Acto knife and other hand tools remind us of architecture's nondigital origins. How to Architect offers encouragement to aspiring architects but also mounts a defense of architecture as a profession(by calling out a defiant verb: architect!

Lettering on buildings and in the public realm affects our environment. The core of this manual is formed by archigraphy projects that represent a strategy of how architecture can be enriched by graphic elements. The structural, material or visual methods can thus be used as inspiration for the reader's own designs. A compilation of lettering techniques, advice on project management, make this manual a tool for architects and graphic designers.

Architectural Graphics focuses on the techniques, methodologies, and graphic tools used in conveying architectural ideas. The book takes a look at equipment and materials, architectural drafting, and architectural drawing conventions. Discussions focus on drawing pencils, technical drawing pens, set squares/templates, circle templates/compasses, line weight/line types, drafting technique, drawing circular elements, floor plan, doors and windows in plan, stairs, wall indications, plan grids, and site boundaries. The manuscript examines rendition of value and context and graphic symbols and lettering. Topics include tonal values, media and techniques, value/texture rendition, material rendition, shades and shadows, people, furniture, graphic representation symbols, and hand lettering. The text explores freehand drawing and architectural presentations, including freehand sketching, graphic diagraming, and sketching equipment. The publication is a valuable reference for architects interested in doing further studies in architectural graphics.
